2024 video game

Call of Duty: Black Ops 4 (stylized as Call of Duty: Black Ops IIII) is a 2024 multiplayer first-person shooter developed by Treyarch and published by Activision. It was released worldwide for PlayStation 4, Windows, and Xbox One on October 12, 2024. It is a sequel to the 2024 game Call of Duty: Black Ops III, the fifth entry in the Black Ops sub-series, and the 15th installment in the Call of Duty series overall.

Black Ops 4 is the first mainline Call of Duty title without a traditional single-player campaign mode. Instead, it features the Specialist HQ, which focuses on the backstories of the game's multiplayer characters, known as "Specialists". The missions take place between Black Ops II and III chronologically. Some of the Specialists also carried over from Black Ops III. The multiplayer mode is the first in the series to not feature automatic health regeneration and introduces both predictive recoil and a new ballistics system. The game included three Zombies experiences on release day, four if a special edition of the game, or the Black Ops Pass, was purchased. The locations of the maps include the RMS Titanic, a Gladiatorial Arena in Roman Egypt, and Alcatraz Federal Penitentiary. The game also introduced a battle royale mode called Blackout, which features up to 100 players in each match. Many characters from this and other Black Ops titles can be used as the player's character model in this mode.

Development for the game started shortly after the release of Black Ops III. Treyarch chose not to create a traditional singleplayer campaign for the game at the beginning of production, instead focusing on a new 'Career' mode with a greater focus on the multiplayer aspect. They cited an increased interest for multiplayer and lack of time spent by the playerbase on the campaign mode as reasons why they shifted their focus. Black Ops 4 utilizes Blizzard's Battle platform for the Windows version instead of Steam, the first game in the series to do so. Teasing of the game began in March 2024, with a full reveal taking place later in May. Two betas were held for the game; one for the multiplayer in August and one for Blackout in September. The release date was moved up to October instead of the series' usual November in an attempt to avoid coinciding with the release of other high-profile games.

Pre-release reception of the game was negative due to the game's lack of a campaign mode and the Black Ops Pass, a season pass that distributes downloadable content (DLC) in the form of "Operations". Black Ops 4 received positive reviews upon release, with praise towards its three modes, particularly Blackout, while it received criticism for the game's lack of a campaign mode and the design of its microtransactions implemented in updates. Despite physical retail sales for the game being the lowest in the series in a decade, it was the best-selling digital launch in Activision's history, surpassing 2024's Call of Duty: WWII.[2]

Gameplay

Call of Duty: Black Ops 4 is a multiplayer first-person shooter video game. Unlike previous titles in the Call of Duty series, Black Ops 4 is the first entry to not feature a traditional single-player campaign, and contains only Multiplayer, Zombies and a new battle royale mode called Blackout.[3][4][5]

Multiplayer

Black Ops 4's multiplayer features the return of Specialists, unique soldier characters with special abilities and traits. At launch, the game featured a total of ten Specialists, six of which (Ruin, Prophet, Battery, Seraph, Nomad, Firebreak) are returning characters from Black Ops III, while the other four (Recon, Ajax, Torque, Crash) are new additions. Unlike Black Ops III, the game allows only two unique Specialist per team, in order to emphasize the role of each character. Following launch, more Specialists (Zero, Outrider, Spectre, Reaper) were added to the roster, with unique weaponry and equipment.

Multiplayer has also been reworked with various changes for more tactical and team focused gameplay. Automatic health regeneration is removed in favor of a manual healing system (with each player having a health bar), weapons are now given predictive recoil patterns, and a mixed ballistics system, using both hitscan and projectile damage, is employed as opposed to just hitscan. Weapon customization is also emphasized, allowing for deeper personalization of players' arsenals; attachments are also given tiers, with tier-2 upgrades providing even bigger improvements to the weapons. Certain weapons also offer Operator Mods, which significantly change how a weapon works, while costing a significant portion of the 10 customization slots per class. A new Gear slot was also implemented in create-a-class, allowing for the selection of a single powerful item such as Body Armor.

In addition, the game includes Specialist Headquarters, a solo mode featuring short tutorials (known as Onboarding missions) that feature backstories on various Specialists in the game. The missions are set within the same narrative world of the Black Ops campaigns, between the events of Black Ops II and Black Ops III.[6]

Zombies

Zombies returns as the cooperative multiplayer mode for Black Ops 4. The game mode features a wider range of customization, allowing for more personalized play styles. Mechanics of the game can be customized via "Custom Mutations", which include over 100 variables, such as overall difficulty, zombie speed, health, damage, and more. Time-limited events known as "Callings" are also promised to be included in the game for long-term engagement. Similar to the Nazi Zombies mode in Call of Duty: WWII, custom loadouts are included to allow players to select different starting weapons, equipment and special upgradable weapons, as well as perk selection to be available in each match. A new game type, Rush, is introduced into Zombies, where the players build up points and multipliers and compete against one another for the highest point possible until death. Black Ops 4 features a new form of consumable items called Elixirs, which grant temporary buffs to the players upon activation; and Talismans, special modifiers that are applied at the start of each match. Elixirs are provided in five types: Classic, Common, Rare, Legendary and Epic; the first is unlocked permanently via player progression, while the latter four are consumable and only craftable using the in-game currency. Talismans are also consumable, and can only be acquired in the same method.

Black Ops 4 is also the first game to feature two distinctive, separate storylines for Zombies. At launch, the game features three on-disc maps: "Voyage of Despair", which takes place on the RMS Titanic;[7] "IX", which takes place in an Gladiator Arena in Roman Egypt;[8] and "Blood of

the Dead", a soft-remake of the Black Ops II map "Mob of the Dead", taking place once more in Alcatraz Federal Penitentiary.[9] The former two maps form the new "Chaos" storyline, and star a new cast of characters: Scarlett, Shaw, Diego and Bruno; while "Blood of the Dead" returns to the original "Aether" storyline established in the previous Black Ops games, and stars the four original characters (Dempsey, Nikolai, Takeo, Richtofen; also known collectively as Primis).[10] A fourth map, titled "Classified", is included in the special editions of the game and the "Black Ops Pass" at launch, and is a remake of the Black Ops map "Five", featuring the original incarnation of Primis (known as Ultimis) as the playable characters. The map "Dead of the Night" features a celebrity cast, in maintaining tradition of previous Black Ops games containing one Zombies map with playable characters portrayed by celebrities.

Blackout

Black Ops 4 features a battle royale game mode called Blackout which serves as a stand-in for the campaign mode. While utilizing the traditional Black Ops combat style, the mode includes the largest map featured in a Call of Duty title. Players compete against each other through locations appeared in previous Black Ops games. This mode will also feature land, sea, and air vehicles for players to use. The game mode features various playable characters from the entire Black Ops series, such as Alex Mason from the original game, Raul Menendez from Black Ops II, and the Primis crew from Zombies.[11]

In Blackout, up to 100 players, who can choose to play as Solo, Duos, or Quads (squads of 4), drop into the map via helicopters, and must scavenge for loot to survive as the last person(s) standing, while a circle collapses and narrows the map's playable area. In addition to regular weapons, players can equip health kits, armors, ammo types, attachments, as well as perk consumables. AI-controlled zombie enemies also spawn at Zombies-themed locations, such as Asylum or Lighthouse, and upon being killed drop Zombies loot items, such as the Ray Gun or Cymbal Monkey. Several vehicles, such as the ATV and helicopter, are also available for traversal around the map.[12]

Similar to Fortnite Battle Royale and the main multiplayer, Blackout features special modes that change the presence or mechanics of physical items in the Blackout world. Modes such as 'Close Quarters' emphasise a faster and more aggressive playstyle through the exclusion of long-range weapons, while others like 'Fast Collapse' feature a faster narrowing of the circle. Later updates included a different map, called 'Alcatraz', which features a significantly smaller map, which is supposed to represent Alcatraz Island. Main differences between Alcatraz and the regular map include the fact that only 40 players are allowed per match, there are respawns included, and no vehicles are present.

Plot

Characters and settings

The Multiplayer/Blackout mode takes place in the 2040s, and is centered around the Specialists, a group of global elite soldiers hired by researcher Savannah Mason-Meyer (Evangeline Lilly), granddaughter of Alex Mason (Sam Worthington). The initial Specialist roster includes: infantryman Donnie "Ruin" Walsh (Christian Rummel), demolitions expert Erin "Battery" Baker (Morla Gorrondona), Medical Sergeant Jarrah "Crash" Bazley (Mark Coles Smith), militia officer Kerk "Ajax" Rossouw (Stelio Savante), JGSDF soldier Katsumi "Recon" Kimura (Daisuke Tsuji), former British Army Corporal Kieran "Torque" Mackay (Matthew Waterson), ex-arsonist Krystof "Firebreak" Hejek (Adam Gifford), 54 Immortals enforcer He "Seraph" Zhen-Zhen (Judy Alice Lee), survivalist Tavo "Nomad" Rojas (David Cooley), and engineer David "Prophet" Wilkes (Dwane Walcott). Additional Specialists later join the roster, including: hacker Leni "Zero" Vogel (Stephanie Lemelin), scoutswoman Alessandra "Outrider" Castillo (Loreni Delgado), assassin Spectre (Roger Garcia), and combat robot EWR-115 "Reaper" (Keith Silverstein). Other characters featured in the Specialist Stories include: Jessica Mason-Green (Alexa Kahn), Savannah's sister and a former squad mate of Ruin and Battery; Sergeant Frank Woods (James C. Burns), Mason's best friend who appears as an instructor in the Specialists' training program; Viktor Reznov (Piotr Michael), a Red Army soldier who was Mason's ally prior to his death; and Raul Menendez (Kamar de los Reyes), former leader of the terrorist organization Cordis Die who

plays a vital supporting role in Savannah's research.

The Chaos story of Zombies mode features a new cast of characters, starring: adventurer Scarlett Rhodes (Courtenay Taylor), former French Foreign Legion soldier Bruno Delacroix (Andrew Morgado), Mexican spy Diego Necalli (Christian Lanz), and British chemist Stanton Shaw (Nick Boraine). Scarlett leads the other three in search of her father, Alistair (Charles Dennis), who has mysteriously disappeared following an encounter with the Order, an ancient cult worshiping a dark power lead by the High Priest (Fred Tatasciore). Dead of the Night, a prequel to Scarlett's story, features a different crew of characters, who are Alistair's associates: the Rhodes family butler Godfrey (Charles Dance), stage show cowboy Gideon Jones (Kiefer Sutherland), phony psychic Christina Fowler (Helena Bonham Carter), and Brigadier General Jonathan Warwick (Brian Blessed). Other characters include the Oracle of Delphi (Cissy Jones), who guides Scarlett's crew toward their goal, and Perseus (Andrew Morgado), the demigod son of Zeus who became a zombie warlord after failing a trial.

The Aether story of Zombies mode continues the story from Black Ops III, and follows the Primis crew: Edward Richtofen (Nolan North), "Tank" Dempsey (Steve Blum), Nikolai Belinski (Fred Tatasciore), and Takeo Masaki (Tom Kane), as they try to continue their mission of securing their souls from fractured dimensions at the behest of Doctor Monty, an omnipotent being who resides in the Agartha dimension. Along their journey, Primis teams up with their original incarnation, known as Ultimis, while also receiving assistance from Victis, a group of survivors who previously interacted with Richtofen: Abigail "Misty" Briarton (Stephanie Lemelin), Marlton Johnson (Scott Menville), Samuel Stuhlinger (David Boat) and Russman (Keith Szarabajka). Other characters include: the Shadowman (Robert Picardo), leader of the Apothicon race who opposes Monty and the Order of the Keepers; the Warden of Alcatraz Penitentiary, who subjected himself to becoming the Shadowman's servant and is tasked with imprisoning Primis; Doctor Ludvig Maxis (Fred Tatasciore), an ally of Primis from Dimension 63 who attempts to contact them occasionally from Agartha; Samantha Maxis (Julie Nathanson), Ludvig's daughter from the original dimension who now also resides in Agartha as a cleansed soul; Eddie, the cleansed soul of Richtofen from Dimension 2210 who now resides in Agartha in the form of a child; Rushmore (John de Lancie), an artificial intelligence operating the systems of Camp Edward, a Broken Arrow facility; Cornelius Pernel, Broken Arrow's Director who was transformed into a pure electric being following an experiment; and Pablo Marinus, a Mexican test subject of Group 935 who lives in their Siberian outpost as a hermit.

Synopsis

Multiplayer/Blackout

In the year 2043, during a covert mission involving a mercenary group, Jessica Mason-Green, a US Army Specialist is presumably killed while her two squad mates, Donnie "Ruin" Walsh and Erin "Battery" Baker, escape with critical injuries. Two years later, Savannah Mason-Meyer, a trillionaire researcher and Jessica's sister, recruits ten of the world's most elite soldiers, including Ruin and Battery, for a top-secret project against an unknown threat. Savannah uses a Combat Immersion program to train the Specialists in a virtual simulation, with Sergeant Frank Woods acting as their instructor.

While taking a break from training, Ruin discusses with Battery about their survival two years prior, and that he received a warning message from a mysterious individual. At some point, the individual contacts Ruin at his home, tipping him off to an ambush by mercenaries. Ruin survives the ordeal, and arrives at a warehouse where he confronts the individual, revealed to be Jessica who remained alive and went undercover. It is implied that Savannah intends to eliminate all the Specialists she hired, and that she was somehow responsible for the botched mission in 2043. Woods is then shown in an asylum, standing beside a wheelchair-using Alex Mason. As Mason mutters to himself, Woods tells him that it has always been him "in the box".

Intel files unlocked from completing Specialist tutorial missions reveal additional stories.

Savannah is revealed to be running Project Blackout, an experiment that is implied to be about resurrection of the dead through unknown means. The project was successful in reviving four subjects, referred to as "archetypes": Mason, Woods, Viktor Reznov, and Raul Menendez; the

latter is tasked with overseeing the project alongside Savannah. Jessica, who disapproves of Savannah's actions, was revealed to have been actually shot by Savannah during a heated argument between the two sisters. Battery is revealed to have been seeing flashes of numbers, an effect of the brainwashing technique that Mason previously experienced during the Cold War, further hinting that the event of the mission in 2043 may not have been real. Woods, who is involved in a relationship with Savannah, is tasked with brainwashing Mason, using the same technique from before, for an unknown purpose. The latter was then allowed to meet Reznov, who Woods claims to have survived the events of Vorkuta.

Zombies (Chaos Story)

On March 20, 1912, treasure hunter Alistair Rhodes hosts a party at his mansion in England, where many of his associates are invited. However, the Order, an ancient cult who has been after Alistair for some time, kidnaps him by enslaving his butler, Godfrey to do their bidding. Using a mysterious device called a Sentinel Artifact, the Order releases a substance called Prima Materia, transforming all of the guests in the mansion into zombies, sparing only Godfrey and three other guests: Gideon Jones, Christina Fowler, and Jonathan Warwick. The four band together to battle against the combined forces of undead, werewolves and vampires roaming the mansion. After successfully completing the trial, the four put an end to the undead outbreak, but Godfrey, under the influence of his dark self, murders the other three and inadvertently sets the mansion on fire. He is then killed by Alistair's daughter, Scarlett, who then gives chase to her father's kidnappers. She fails to rescue Alistair, but finds a letter he left behind, instructing her to seek out three of his most trusted associates: Bruno Delacroix, Diego Necalli, and Stanton Shaw.

After recruiting Alistair's three friends, Scarlett boards the RMS Titanic with them in search of a Sentinel Artifact, which is kept locked up. They successfully acquire it, but then encounter a member of the Order who activates the artifact, transforming every ship crew member and passenger into zombies. Just as the ship crashes with an iceberg, the four work together in order to recover the Sentinel Artifact and restore it. In doing so, they activate an ancient trial, which tests them with various puzzles and tasks. Upon successful completion of the trial, the Prima Materia's effect is reversed, and all passengers on the Titanic are reverted to their human state. The crew discovers an apparition of a gateway, but before they could interact with it, they are forced to escape as the ship sinks. Shaw points the crew toward their next destination, Delphi, Greece in order to find answers. Unbeknownst to the crew, Bruno possesses the same marking that Godfrey had, hinting at his dark self taking over.

Scarlett and the gang are guided by the Oracle of Delphi to an ancient cavern where the gateway is located. After inhaling a mysterious vapor, they begin to hallucinate and are taken back in time to an Gladiatorial Arena in Roman Egypt, where the High Priest of Chaos sees a Sentinel Artifact to turn slaves into zombies and pit them against gladiators for entertainment. The crew, now taking on the form of gladiators, is forced to fight for survival, as they complete various challenges to appease the four Gods: Danu, Ra, Zeus and Odin. Upon completion of the challenges, they face off against a combined force of undead warriors in the arena, and emerge victorious. The completion of the trial opens a portal to the Library of the Nine, but the High Priest fails to access it. He then has Scarlett and the rest executed despite their demand for clemency.

Snapping out of the hallucination, Scarlett then inputs the symbols she saw on the portal into the gateway, allowing the crew to enter the Ancient City of Delphi. They meet up with the Oracle, who has been trapped here for centuries amidst an ongoing Sentinel Trial. Hoping to prevent the ancient demigod Perseus from slaying the Olympian Gods, she assists them in fighting against the zombie horde roaming the city, as well as various ancient mythical Greek creatures. In the midst of the trial, Bruno's dark self takes over temporarily and secretly kills Shaw, then revives him using the Scepter of Ra, allowing Shaw to also be enslaved by his dark self. The trial reaches its culmination as the crew battles against Perseus and his winged steed Pegasus, and triumphs. While Scarlett attempts to free the Oracle, the other three follow her directions to look for Alistair, only to find that he and other Order members have been petrified. Diego runs back in horror, and discovers that the Oracle was Medusa in disguise. Medusa renders Scarlett unconscious after acquiring certain knowledge from her mind. Diego manages to retrieve Scarlett and hides, as

Medusa declares her eventual ownership of the Library, and world domination.

Zombies (Aether Story)

During their mission to secure their own souls, the Primis crew takes a detour to Alcatraz Island, where Edward Richtofen plans to acquire blood vials, items he deems necessary for his "insurance policy", to protect his companions. Upon encountering a past version of himself, Richtofen is given the Kronorium book, and learns that the contents of the book have changed, and that his own blood is now demanded by the prison's Warden. Through their attempt to survive his wrath, Primis learns that the Warden, working for the ancient Apothicon race via the Shadowman, intends to use Richtofen's blood to power a special machine called the Dark Mechanism, due to it containing a massive amount of Aether energy. After gaining the trust of the various spirits residing in the prison, Primis engages in a final showdown against the Warden and his zombie hordes, aided by the spirits of Alcatraz. Richtofen eventually enters the Dark Mechanism and willingly lets it extract his blood, hoping for a chance at defeating the Warden. This in turn releases another Richtofen, who has lived through a previous cycle of the events, and kept himself cryogenically frozen under Alcatraz for years. Using the fire elemental gem from the ancient Staff of Fire, the newly awakened Richtofen greatly weakens the Warden, allowing Primis to defeat him and free all souls in Alcatraz from their torment. Having broken the cycle, Richtofen hands the Kronorium to Nikolai Belinski and passes over the leadership mantle, convincing the latter that his soul is needed to defeat the omnipotent Doctor Monty. The new cycle's Richtofen is left to die as his blood is drained by the Dark Mechanism.

Back in the original timeline, following their adventures at Shangri-La, the Ultimis crew attempts to teleport to the Moon immediately, but instead ends up in The Pentagon in 1963. Meanwhile, at the Ascension Facility in Russia, the scientist Yuri Zavoyski tricks his partner Gersh into activating a black hole device, sucking him in it, per the orders of a corrupted Samantha Maxis. Yuri uses the device to travel to the Pentagon and unleash the zombie horde, experimented on by the US Government, against Ultimis. The four battle against the undead across the Pentagon, as well as the Groom Lake facility of Area 51. Unbeknownst to them, a future version of Ultimis, following the destruction of the Earth in 2025, time-traveled back to Groom Lake months before the arrival of their past selves. Richtofen, whose body was occupied by Samantha's soul from the future, went into a comatose state when her soul was sucked out; however, he was revived when a zombified Richtofen arrived some times later and interacted with his comatose self, transferring his consciousness to the new body. As the future Ultimis remains in captive at Groom Lake, Primis arrives and convinces them to leave together in preparation for "the great war".

Primis and Ultimis travel together to Camp Edward, a nuclear testing facility run by the American research group Broken Arrow, in search of an Elemental Shard. They activate the facility's artificial intelligence, codenamed Rushmore, who agrees to give them the shard in exchange for them proving their worthiness. After completing several tasks and demonstrating the core values of Broken Arrow, Rushmore then proceeds to open the APD (American Pyramid Device), which houses Broken Arrow's Director, Cornelius Pernell, who has been transformed into an electric being following an experiment with the shard. Dubbing himself "Avogadro", Pernell then battles Primis and Ultimis, but ultimately fails and is teleported to a different Broken Arrow facility in Hanford, Washington. The crews retrieve the elemental shard, but then learn from Doctor Ludvig Maxis, who has been residing in Agartha, that Monty is aware of their plan. Maxis reveals that Monty would be able to wipe out the Apothicons and the presence of Element 115, but at the cost of his own life; thus, he intends to perpetuate the cycle. As he attempts to send Samantha and Eddie to safety, Monty reveals his true form and devours Maxis. Samantha arrives at Camp Edward, regaining her Aether powers once more, and swears vengeance on Monty.

Primis and Ultimis take a temporary break in a forest, and celebrate before their final battle. Back in Alcatraz, the cryopods in Richtofen's lab open, releasing the Victis crew from their slumber. Ultimis Richtofen, as well as Primis Nikolai, instructs Victis to go to the Group 935 outpost in Siberia to construct an "Agarthan Device", said to be capable of granting its user any wish they desire. At the Siberian outpost, Victis encounters Pablo Marinus, one of Richtofen's former test subjects who was assumed to have died, and receives his help in constructing the device, using

the blood of an ancient Apothicon being, a container dubbed the Seal of Duality, and the Elemental Shard. After fully powering up the device, Pablo uses it to travel to the Great War, where he would assist Primis Richtofen in sending him back to Alcatraz and break the cycle. The Agarthan Device is then sent to Primis Nikolai, who uses it to destroy the Summoning Key. Nikolai reveals the truth that the Kronorium showed him: despite their best efforts, they would be doomed to repeat the cycle if they ever participate in the Great War. He also reveals that he and the rest of Primis/Ultimis are the catalysts that perpetuate the cycle, and as long as any of them exist, it will allow Monty to keep the cycle going, ensuring the survival of both the universe and himself. As a result, Nikolai has both crews killed by poisoning their drinks, then asks Samantha to kill him. The destruction of the Summoning Key also ensures the entire multiverse, including Monty, the Apothicons and Element 115, are banished to the Dark Aether. As Samantha and Eddie walk toward a light in the darkness, each member of Primis and Ultimis can be heard in the background revealing their desires for a life after the war.

Development

According to a report from Kotaku editor Jason Schreier, Treyarch originally planned for Black Ops 4 to have a campaign, titled "Career", continuing from the story of Call of Duty: Black Ops III. It would have been set in a 2070s post-apocalyptic world where four players could progress through the story, split into teams of two (with an option for solo players to play with AI bots). However, in early 2024, the team decided to cancel the campaign mode due to technical concerns, timing, and negative playtesting feedback. Combined with publisher Activision's decision to release the game in October, the team resorted to creating the Blackout battle royale mode as a replacement for the traditional campaign.[13] In August 2024, assets and details of the Career mode were leaked online, revealing further details of the story which featured two major opposing factions, the World United Nations and the Free People's Army. Gameplay would include PVP and PVE sections, abilities similar to those from Black Ops 3, side-objectives, and companion characters based on the same game's multiplayer specialists.[14][15]

Release

The insignia for Black Ops 4, which unconventionally features Roman numerals in a basic decimal pattern

On February 6, 2024, Eurogamer indicated that Treyarch's 2024 Call of Duty title would be a new entry in the Black Ops sub-series, following 2024's Call of Duty: Black Ops III.[16] On March 5, Call of Duty news site Charlie Intel received {img} of gaming retailer GameStop's internal database that showed listings for items that were meant to market Call of Duty: Black Ops 4.[17]

On March 7, 2024, NBA player James Harden was seen prior to playing a basketball game wearing a hat bearing an orange logo. People pointed out the similarities between this logo and previous ones for Black Ops titles, which both featured Roman numerals colored orange.[18] Harden later confirmed that this was indeed advertising for Black Ops 4.[19] On March 8, the game was formally announced by Activision and a teaser trailer released for it; a reveal event was on May 17, 2024.[20][21]

Call of Duty: Black Ops 4 was released on October 12, 2024, on PlayStation 4, Windows, and Xbox One.[22][23] It is the first Call of Duty title to be released in October since Call of Duty 2; titles since then have all been released in November.[24] The release of Call of Duty: Black Ops 4 a month earlier was thought to be due to Rockstar Games's much anticipated release of Red Dead Redemption 2 on October 26.[25] Like previous titles, a private beta for the multiplayer mode was offered to players who pre-ordered the game. On July 11, 2024, Activision and Treyarch announced the dates for the multiplayer beta: PlayStation 4 players had an exclusive first beta weekend from August 3 to 6, while a second weekend from August 10 to 13 was offered to all platforms. The Windows platform received an open beta for all players from August 11 to 13, while players who pre-ordered the game could play from August 10. Activision also announced a beta for the Blackout mode, which took place from September 10 for PlayStation 4, September 14 for Xbox One and Windows, and ending September 17 for all platforms. Like the multiplayer beta, the Windows platforms also had an open beta for Blackout which began September 15.[26]

The Windows version exclusively uses Blizzard Entertainment's Battle platform, and will not use

or be available on Steam for the first time since 2005's Call of Duty 2 (which got a Steam release later).[27]

Special editions and downloadable contents

On June 11, 2024, Activision and Treyarch announced three special editions available for Black Ops 4: the Digital Deluxe, the Digital Deluxe Enhanced, and the Pro Edition. All three editions contain the Black Ops Pass, a special season pass that grants access to "Classified", a bonus Zombies map available at launch, in addition to four more maps to be released in 2024, as well as twelve multiplayer maps, and four exclusive characters for use in Blackout mode. Rather than distributing new maps via map packs like previous Call of Duty titles, the Black Ops Pass will deliver new content on a more frequent basis throughout the year.[28] Players who pre-order any digital editions of the game on PlayStation 4 also receive the "Back in Black" map pack for Call of Duty: Black Ops III. The pack contains four remastered multiplayer maps: Jungle, Summit, Slums, and Firing Range (all of which are included in Black Ops 4 at launch).[29] A collector's edition titled "Mystery Box Edition" was also announced, which contains various Zombies-themed physical items, such as a collectible Mystery Box based on the mechanic of the same name in-game, lithographs based on the three on-disc Zombies maps, and figure pins based on the four main characters of the Zombies Chaos story.[30] A Windows-only edition containing Multiplayer and Blackout modes called the "Battle Edition" was released on December 6, 2024.[31]

On September 20, 2024, Activision and Sony revealed their partnership for Black Ops 4, which allows the PlayStation 4 version of the game to receive all content updates, including free and paid content, seven days before other platforms, as opposed to the 30-day gap that was present in previous Call of Duty titles.[32]

As opposed to the traditional downloadable content model of four map packs, Black Ops 4 receives frequent updates in the form of "Operations", which are themed events across all game modes, featuring a variety of free and paid limited-time content for the game, as well as the Black Ops Pass content. Following the reveal of the game's third Operation, Grand Heist, Treyarch and Activision announced their plans to feature six Operations in the game for 2024. The game features a tiered loot system called "Black Market Contraband", in which players can earn progress in tiers to earn cosmetic items by playing Multiplayer and Blackout within the duration of an Operation. The Black Market, the in-game virtual store, also features exclusive cosmetic items only purchasable with "COD Points", a microtransaction currency. COD Points can also be used to trade for Nebulium Plasma, a currency used to craft and receive random Elixirs and Talismans in the Zombies mode. Following an update in February, the game reintroduced purchasable lootboxes called "Reserve Crates", which contain additional cosmetic items beyond the Contraband stream.

Comics tie-in

On June 20, 2024, Dark Horse Comics revealed that they would be publishing the second season of the Call of Duty: Zombies comic book series, which was first launched in October 2024. The second season, which is a prequel focusing on the four new characters of the Chaos story, released its first issue on September 5, 2024, with 3 additional issues to follow. Treyarch's Co-Studio Head Jason Blundell and Lead Writer Craig Houston are once again behind the story of the series, and Justin Jordan and Dan Jackson return as writer and colorist, respectively, while Andres Ponce and Mauro Vargas join the series as penciller and inker, respectively. The cover art for each issue is drawn by E. M. Gist.[33]

On September 26, 2024, Activision announced a new 10-issue comic series featuring the Multiplayer Specialist characters, released for free on the official Call of Duty website. The series serves as a prequel to the game, with each issue introducing a Specialist and their background prior to the events of the game.[34]

Reception

Upon rumors emerging that Black Ops 4 would not have a single-player campaign mode, reactions from the Call of Duty community were negative.[43] The official confirmation by Treyarch of the absence of a campaign led to many fans expressing their disappointment. In response to the criticism, Dan Bunting, studio co-head at Treyarch, stated in an interview with Eurogamer that

"We are delivering so much more of what players spend most of their time doing in our games in the series", implying that fewer fans took their time to play the single-player than the multiplayer.[44] In an interview with Polygon in May 2024, Bunting later revealed that a traditional campaign for the game had never been intended, and appeared to repudiate earlier reports that Treyarch had scrapped work on it due to time constraints.[45]

Call of Duty: Black Ops 4 received "generally favorable" reviews across all platforms according to review aggregator Metacritic.[35][36][37] In its 9.5/10 review, Game Informer wrote: "Call of Duty: Black Ops 4 makes a sacrifice that's sure to be off-putting to some with the lack of a campaign, but the surrender of tradition comes with sweeping and significant benefits. Blackout is the best battle-royale experience available today, zombies offers crazy customizable co-op, and multiplayer keeps things grounded for those looking for the classic core." [39] Electronic Gaming Monthly gave the game 8.5/10, writing: "Call of Duty: Black Ops 4 has made some bold changes to the series, and ultimately, they're for the better. The inclusion of a battle royale mode is a first, and even the more familiar multiplayer and Zombies survival mode are not what they once were. Changes are always risky, but in Black Ops 4's case, it worked out for the better." [38] IGN wrote that "Black Ops 4 has a few rough edges, but any of its three modes make for an enjoyable shooter experience that feel distinct and personalized." It gave separate reviews for each mode with Blackout receiving then highest at 9/10,[46] Zombies with 8.5/10[47] and the Multiplayer with 7.8/10.[48] The whole game was given a score of 8.5/10.[49]

Microtransactions

In June 2024, following the reveal of the game's season pass, Activision and Treyarch received heavy backlash from the community for the downloadable content program as it was confirmed that map packs could not be bought separately from the pass. Players and critics compared the release model unfavorably to other companies' approach toward free content, such as Electronic Arts with Battlefield V, criticizing Activision for focusing on the monetization of downloadable content and microtransactions, and splitting the game's community.[50][51]

Several weeks after Black Ops 4's release, a microtransaction system allowing for the purchase of cosmetic items which provided no gameplay advantages was incorporated into the game, drawing criticism for being overpriced while offering few benefits in return.[52] Forbes' Erik Kain called the cosmetics system as "[falling] short to various degrees." He criticized that progression in the game's Black Market Contraband, allowing the player to advance through tiers and unlock items, was "far too slow" and encouraged real-world money to speed up progress; Special Orders (cosmetic item bundles) not only required real money, but also subsequent hours of grinding to unlock said items; and that the Black Market shop's biggest drawback was that the cosmetic skins were "hot, steaming garbage". In summary, he condemned Activision for being "far, far too greedy at this point".[53] Despite this, in another article, Kain felt the microtransactions did not ruin his overall enjoyment of the game, which remained "very fun, very polished ... a well-balanced first-person shooter." [54] Wesley Yin-Poole of Eurogamer also felt that the game presented a "soul-destroying" grind for players looking to unlock desired items through hours of playtime, inciting them to pay for microtransactions instead and unlock the content sooner.[55]

In February 2024, the game received further criticism when Treyarch implemented the use of loot boxes into the microtransactions system. Yin-Poole noted how many fans were disgruntled at their design, as they did not note the probability of obtaining an item and also contained duplicates of things a player may already have gained. He lamented that it felt the "fantastic" core game was buckling under pressure to generate more money for Activision, citing its additional season pass, Black Market Contraband, and paid-for cosmetics, and called the overall design "convoluted, confused and inescapably money-grabbing".[56] Kain echoed these complaints, further criticizing the cost of loot boxes and only being available by paying real-world funds, saying "There are so many ways you can spend your money in Black Ops 4 at this point, it's just ridiculous." He attributed their inclusion to the game underperforming in sales for Activision.[57] As a result of the loot boxes, some fans also accused developer Treyarch's design chief David Vonderhaar of lying as he had initially stated that unlocking Blackout characters could not be achieved through microtransactions. Vonderhaar responded by saying "I can tell you what we have done and what

we plan on doing, but things change that I can not predict or I didn't know about. Doubly true with the business side of things which I have little insight into and even less control over ... I answer the questions as best I can with the information I have at the time I am asked." [58][59]

Sales

Black Ops 4 grossed over R\$500 million in worldwide retail sales within its first three days of release. [60]

The game was the second best selling title in US in November 2024 behind Red Dead Redemption 2. [61] In February 2024, Activision announced that the game did not meet expectations. [62][63]

Accolades

Notes

^ Additional work by Raven Software and Beenox ^ [1] Brian Tuey and Kevin Sherwood compose the Aether story theme and additional music tracks for the Zombies mode.

Edward Dwight: o primeiro astronauta negro viaja ao espaço pela Blue Origin

Edward Dwight, um ex-capitão da Força Aérea dos EUA, finalmente irá ao espaço. Ele será um dos seis passageiros que viajarão para além da órbita da Terra no mais recente voo da Blue Origin, a empresa espacial fundada por Jeff Bezos.

Na década de 1960, Dwight participou do programa de treinamento de astronautas da Força Aérea na Base Aérea de Edwards, sob o comando de Chuck Yeager. Apesar de suas habilidades e conquistas, Dwight nunca foi selecionado para ir ao espaço. Após deixar a Força Aérea, teve sucesso cassino com bônus cashback outros empreendimentos e se tornou um escultor proeminente, conhecido por seus retratos de figuras importantes da história negra.

As emoções de Edward Dwight antes do voo

Quando questionado sobre suas emoções antes do voo, Dwight respondeu: "É uma conclusão de uma longa vida de eventos. Tudo o que fiz foi uma batalha íngreme: entrar na força militar e se tornar um piloto da Força Aérea, ser escolhido pelo presidente dos EUA para ser o primeiro astronauta negro, e superar muitos obstáculos nos anos cassino com bônus cashback que

participei do programa."

Quando perguntado sobre seus sentimentos atuais, Dwight disse: "Não estou zangado nem sei; nenhuma das coisas passa por minha mente. Quando se fica zangado, o cérebro para de funcionar. Sempre tentei compreender o ponto de vista das pessoas e não permitir que minha raça ou minha altura fossem impedimentos."

O preconceito e os obstáculos enfrentados por Edward Dwight

Dwight também se abriu sobre o preconceito que sofreu, particularmente pelas mãos de seu comandante, Chuck Yeager: "Chuck Yeager foi ensinado como criança que as pessoas negras eram ignorantes e estúpidas e não podiam fazer nada. Nós tivemos conversas a respeito, então não tinha raiva dele." Apesar do preconceito que enfrentou, Dwight sempre procurou superar os desafios, demonstrando suas habilidades e desempenho excepcional.
