Penalty Shoot out Casino Game Strategy

There isn't much strategy in a 7 simple arcade game like Penalty Shoot Out casino. You have five bets to pick from, and it's basically a guessing 7 game since you're aiming to score a goal against the odds.

Penalty Shoot-out is a test of strategy and skill. By 7 taking your time to aim precisely, you can place the ball in such a way that it will be more 7 difficult for the goalkeeper to block. To increase your odds at scoring, target one of the goal's corners. Strategize ahead 7 by anticipating what moves the keeper may make.

Understand the Probabilities of the Game

The only thing you can do is grasp 7 the odds for each of the available bets. The probability of scoring a goal, as well as the premium and 7 vig (the amount wagered minus eventual winnings), is listed in the table below:

BET	PROBABILITY	PAYS	HOUSE EDGE
Upper Left	8.1%	7 12 to 1	97.2%
Upper Right	8.1%	12 to 1	97.2%
Top	19.2%	5 to 1	96.0%
Lower Left	32.3%	7 3 to 1	96.9%
Lower Right	32.3%	3 to 1	96.9%

The lowest paying wagers on the top corners, which pay 7 out at 12 to 1, have the highest risk of winning. However, these locations only succeed 8.1 percent of the 7 time. The house advantage on these bets is also the greatest in the game, at 97.2%.

The difference in house edge 7 between the tough Upper corner bets and the much easier scored Lower corner bets is insignificant. When betting on either 7 of the Lower Left or Lower Right options, you'll score a goal 32.3 percent of the time.

Finally, in the Middle 7 bet, you'll win a goal 19.2 percent of the time. With a house edge of 96 percent, this wager is 7 the most conservative in Penalty Shootout casino.

Paylines

In Penalty Shoot-Out, there are no paylines – just goal positions that can give 7 you the chance to pocket a reward! Strike your shot past the keeper and score yourself a payout.

To maximize your 7 payout, you must get the opposing team's end on the multiplier meter. The final stage of this game promises a 7 rewarding prize of up to 30.72x your original bet.

Track your progress with the meter above the goal and identify possible 7 rewards. The winning multiplier begins at 1.92x for the first goal and increases by 2x every time you make a 7 successful shot, granting lucrative prizes:

1st goal – 1.92x the stake.

2nd goal – 3.84x the stake.

3rd goal – 7.68x the stake.

4th 7 goal – 15.36x the stake.

5th goal – 30.72x the stake.
