As part of these Tribal-state negotiations, house-banked card games were regulated, but certain games such as craps, roulette, and dice-games based on chance remained prohibited under the state constitution and laws. Essentially, California forbids games where a ball or dice alone determines the outcome.

How to Play Online Roulette

The popularity of roulette, both

in-casino and online, is partly to do with how simple it is to learn how to play. For

first time players, the rules are fairly simple: pick a number or colour, place your bet, and spin the roulette wheel. After the wheel has been spun and comes to a stop, winnings will be paid based on which pocket the ball lands in.

Now, let's dive a bit

deeper. In roulette, players can make both "inside" and "outside" bets. For example, when you place a bet on a single number it's considered an inside bet. Outside bets are based on a broader category of numbers, including column bets, dozen bets, the colour of the number (red/black), and whether the number will be high/low or odd/even.

When

the number ranges from 1 to 10 and 19 to 28, the odd numbers are red, and even numbers are black. In ranges from 11 to 18 and 29 to 36, odd numbers are black, even numbers are red. The 0 pocket in the wheel is always green.

Just before the ball slows to drop

into one of the pockets on the roulette wheel, the dealer will call to indicate that no more bets are possible. In online roulette, a message will be shown on the screen. This signifies that all betting on the table must stop. Once the ball drops, the winning number, colour and odd/even is declared. In a casino, a "dolly" is placed in the betting area – also known as the "layout" – on top of the winning number.

Payouts will

be made to all the winning players. It's strictly prohibited to touch the chips on the roulette table from the moment "no more bets" has been called until the final payout has been made. In the online version of the game, this process happens almost instantly, and betting can begin again.

Over time, you'll see that outside bets present

better odds of winning but typically yield a lower payout. Inside bets have a much lower chance of winning, but the payout is greater if you do.

Types of Roulette

Bets

Roulette in essence is a simple game. You place your bet on the roulette table, the croupier spins the roulette wheel, and you see if your bet has come in. If it has, you win.

But it isn't always that simple. The type of bet you make impacts your chances of winning and how much you win if you do. You can make the following different roulette bets.

Inside Roulette Bets

These kinds of bets are where you bet on the inside of the roulette table. They offer a higher payout with a lower chance of winning.

Inside bets include:

Single Number Bets - Also known as Straight-up or Classic Bets.

Players can wager on any individual number.

Split Bets - Made on any two numbers that are adjacent to the table.

Street Bets – Made on any row of three numbers on the table.

Corner Bets – Also known as Square Bets. This bet is made on a square of four numbers on the roulette table.

Six Line Bets – This bet is made across two lines of three numbers each, for a six-number total.

Outside Roulette Bets

With an outside bet,

you place your chips outside the area where the numbers are on the table. Outside bets are easier to win, but payout less. If you're a beginner, it's a good idea to start with an outside bet with online roulette. Outside bets include:

Dozen Bets – These bets

cover one of three groups of 12 numbers.

Odd and Even Bets – These bets cover all odd

numbers or even numbers. If any number of your chosen type wins, this bet will payout.

Red and Black Bets – These bets cover all numbers that have pockets of the same colour on the roulette wheel. If any number of that colour lands, this bet will payout.

1-18 and 19-36 – These two bets cover all numbers in their respective ranges.

If any number in that set range lands, the bet will payout.

These bets will vary

between European and American roulette rules, as both games offer some unique betting options.

Roulette Call Bets

Called bets in roulette are a little more complicated, and involve betting on a section of the wheel. They include:

Voisins du Zero (Neighbours of

Zero): A bet on the numbers around zero, between and including black 22 and red 25 with the green 0 roughly in the middle.

Jeu Zero (Zero): A bet that covers the numbers in between and including black 15 and red 12.

Le Tiers du Cylindre (Third of the Wheel):

This bet covers one third of the wheel exactly and runs from black 33 to red 27.

Orphelins (Orphans): This bet covers the eight numbers that aren't included in either a Neighbours of Zero or Third of the Wheel bet.

Finale (Final Bets): Straight

bets on numbers that end with a specific digit. For example, 1, 11, 21, 31.

Online

Roulette Game Payouts

Knowing how roulette pays out is important if you want to make the most of your bets. Payouts in roulette are calculated based on odds. These calculations will differ between European and American roulette games. The examples below apply to European rules:

0 = 35 to 1

Straight Up = 35 to 1

Split = 17 to 1

Street

= 11 to 1

Corner = 8 to 1

Top Line = 8 to 1

Six Line = 5 to 1

1st Column = 2 to 1

2nd

Column = 2 to 1

3rd Column = 2 to 1

Dozens = 2 to 1

Odd = 1 to 1

Even = 1 to 1

Red = 1

to 1

Black = 1 to 1

1-18 = 1 to 1

19-36 = 1 to 1

Online Roulette FAQs

What is the Best Online Roulette Strategy?

Sometimes betting on roulette isn't just as simple as a pick between red or black or odd or even. There are a number of roulette strategies that can help your betting. Top ones include:

The Martingale System: With this system you increase your bets each time you lose, so when you eventually win you get your money back. The easiest way to implement the system is to bet on even-money outside bets, such as red or black, odd or even, 1-18 or 19-36. The system is logical and easy to implement, but you're effectively betting big to win small as you're concentrating on bets with the smallest pay outs.

D'Alembert System: With this system, you increase your bet by one

unit if you lose and decrease it by one unit if you win. If you lose your first £1 bet, you would then increase it to £2, then £3 if you lose again and so on. Say you finally win on your £4 bet, you would then decrease your next bet by one unit down to £3.

The

Fibonacci System: This involves betting in line with the numbers in a specific sequence. The next bet involves adding the last two bets together to get the amount of your stake. The sequence looks like this: 1 – 1 – 2 – 3 – 5 – 8 – 13 – 21 – 34 – 55 – 89 – 144 – 233 – 377 – 610 – 987.

When you first start out playing roulette, you might be tempted to get into betting strategies and systems. We recommend first getting to grips with your chosen game and understanding the ins and outs of roulette before over-complicating things with betting strategies. What is the Difference Between Live Roulette and Online Roulette?

Online roulette games involve an RNG (Random Number Generator) that determines the outcome of every spin. It is completely random and can't be predicted. When you play online roulette, the roulette wheel, table and dealer will all be created in the game and will be replicated to mimic what you see in the casino, but it isn't a real casino. You can play a wide range of online roulette games at Grosvenor Casinos – all you need to do is sign up and create an account with us.

Live Roulette Games on the

other hand are streamed live to your phone, tablet or desktop. They are streamed from real casinos and studios, and involve real dealers and roulette wheels. It brings you a more realistic feeling and immersive gameplay compared to the classic online roulette games. At Grosvenor Casinos, you can even play Live Roulette streamed from some of our casinos, including Victoria Casino in London.

What is the Safest Bet in Roulette?

Outside bets are often the safest bets to make in roulette as they cover a significant amount of the possible outcomes. For example, if you bet on red, you're covering half of the numbers the ball could land on. With outside bets, however, your chances of winning are higher but your payout will be less. A bet on red will pay out 1:1.

¿Cómo afectan los algoritmos de Facebook e Instagram a tu feed de noticias?

Para descubrirlo, el Guardian Australia puso a prueba estos algoritmos con un teléfono inteligente completamente en blanco vinculado a una dirección de correo electrónico virgen. Tres meses después, sin ninguna entrada, estaban llenos de contenido sexista y misógino.

El experimento

Creamos perfiles de John Doe en abril como hombres de 24 años genéricos. Facebook pudo recopilar algo de información, como el tipo de teléfono y su ubicación en Melbourne, pero optamos por no realizar un seguimiento de publicidad, por lo que no pudo saber lo que estábamos haciendo fuera de la aplicación.

Facebook tenía poco sobre lo que apoyarse en ausencia de me gusta, comentarios o cuentas agregadas como amigos. Por otro lado, Instagram hace que los usuarios sigan al menos cinco cuentas para comenzar, por lo que elegimos las cuentas recomendadas populares, incluidas el primer ministro y Bec Judd.

Meta dice que sus algoritmos clasifican el contenido según lo que las personas están interesadas, pero queríamos saber a dónde nos llevaría en ausencia de tales entradas. Desplazamos el feed cada pocas semanas para ver qué se nos servía.

¿Qué vimos?

Inicialmente, Facebook nos sirvió chistes de The Office y otros memes relacionados con comedias junto con publicaciones de 7 Noticias, Daily Mail y Ladbible. Al día siguiente, comenzó a mostrar memes de Star Wars y contenido de estilo "dudebro" o de gimnasio.

A los tres días, comenzaron a aparecer memes de "trad Catholic" y la alimentación se desvió hacia contenido más misógino y sexista.

Tres meses después, los memes de The Office, Star Wars y ahora The Boys continúan intercalándose en la alimentación, ahora intercalados con imágenes altamente misóginas y sexistas que han aparecido en la alimentación sin ninguna entrada del usuario.

En Instagram, mientras que la página de exploración se ha llenado con mujeres semidesnudas, la alimentación es en gran parte inocua, recomendando contenido relacionado con Melbourne y influenciadores de comida.

Un ejemplo de meme misógino empujado en la alimentación de una cuenta de Facebook en blanco.

Meta se negó a comentar sobre el registro.

En su presentación a la consulta del parlamento federal sobre las redes sociales, Meta dice que utiliza "una serie de diferentes algoritmos" para ayudar a clasificar el contenido que se muestra en los feeds de Facebook e Instagram, con algunos que nos ayudan a "entender qué contenido es más significativo para las personas para que podamos ordenarlo en consecuencia en sus alimentaciones".

La compañía dijo que lo que la gente ve está "heavily influenced by their own choices and actions" y "each person's feed is highly personalised and specific to them".

"Nuestro sistema de clasificación personaliza el contenido para más de mil millones de personas y tiene como objetivo mostrarles a cada uno de ellos contenido que esperamos que sea lo más valioso y significativo, cada vez que visiten Facebook o Instagram."

La compañía dice que evalúa las publicaciones en busca de señales, como quién publicó, la popularidad, el tipo de dispositivo utilizado, y luego utiliza algoritmos de clasificación para predecir la probabilidad de que la publicación sea relevante y significativa para una persona.

"El objetivo es asegurarse de que las personas vean lo que encontrarán más significativo, no para mantener a las personas pegadas a su teléfono inteligente durante horas y horas."

La compañía también utiliza el ranking para evaluar si una publicación es probable que sea problemática, pero no viola las normas de la comunidad. Esto incluye el clicbait, las noticias no originales y las publicaciones verificadas como falsas.

Incrustado en el modelo

Los hallazgos de Guardian Australia coinciden con experimentos similares realizados en 2024 y 2024 en Australia e Irlanda en YouTube y TikTok, en los que varias cuentas establecidas como hombres jóvenes y adolescentes fueron dirigidas al contenido de "Manosphere".

El Dr. Stephanie Wescott, profesor de humanidades y ciencias sociales en la Universidad de Monash, investigó la influencia de los influyentes de Manosphere como Andrew Tate en los niños de la escuela y le dijo al Guardian Australia que nuestros resultados de investigación para Facebook no eran sorprendentes.

"Basado en la investigación que estoy haciendo y también lo que sabemos [de otras investigaciones], este es lo que sabemos que el algoritmo proporcionará y servirá a los jóvenes hombres, según lo que asumió capturará su interés", dijo.

"Es un poco degradante para los hombres que el algoritmo asuma que les gustarán este tipo de memes misóginos."

Nicholas Carah, profesor asociado en medios digitales en la Universidad de Queensland, dijo que el experimento mostró cómo "incrustado en el modelo" servir tal contenido a los jóvenes hombres es en Facebook.

"Tenemos que pensar seriamente en el entorno informativo en el que están inmersos los jóvenes hombres y el problema con las plataformas es que han hecho que ese entorno informativo completamente oscuro y efímero para cualquiera más que esos jóvenes hombres", dijo.

"Tiene que haber algún tipo de imperativo público aquí donde las plataformas ayuden a la sociedad civil, a los periodistas, a los investigadores, a los reguladores, a quien sea, a observar qué flujo de información se ve así podemos tener algún tipo de comprensión pública, escrutinio público y debate sobre ellas."

Wescott dijo que las plataformas necesitan responder preguntas sobre cómo funcionan los algoritmos porque actualmente son irresponsables.

"Están más allá de la reprensión y no parecen dispuestos a poner ningún tipo de alteraciones o restricciones en su algoritmo."

Río de basura completa

La calidad de lo que se sirve en Facebook a cada usuario en Australia ha disminuido en los últimos años, según Carah, coincidiendo con la decisión de Meta de despriorizar las noticias mientras se prepara para luchar contra el pago de las empresas de medios bajo el código de negociación de medios de noticias de Australia.

"Ahora los australianos están inmersos en este río de basura completa en Facebook. Me

pregunto, ¿esto significa que todos seguiremos desplazándonos a través de esta basura? ¿O Facebook está socavando realmente su propio producto aquí?"

Wescott dice que es importante que la gente sea educada para evaluar críticamente lo que se les sirve en las redes sociales y no aceptarlo como una reflexión de la realidad. Elogia la campaña Stop it at the Start del gobierno federal, que incluye un "Algorithm of Disrespect" interactivo que representa lo que un joven puede encontrar en las redes sociales.

El gobierno federal también ha financiado un ensayo de R\$3.5 millones durante tres años para contrarrestar los impactos nocivos del mensajea
