When it comes to live betting, most gamblers place their bets via sports betting apps. Any business that isn't prioritising their mobile customers is neglecting a huge part of their core audience.

How We Choose the Best Sports Betting Apps

So how do we rate the best sports betting apps? In order to come up with our rankings, our researchers take into account the following criteria, which we apply to all operators we list on this site:

Legality – Is the operator reputable and licensed to operate in the UK?

– Is the operator reputable and licensed to operate in the UK? Safety and Security – Does the operator adhere to standard security practices for online commerce?

– Does the operator adhere to standard security practices for online commerce? Customer Service – How easy is it to reach customer service? What channels do they offer?

– How easy is it to reach customer service? What channels do they offer? Payment Methods – What payment processors are on offer?

– What payment processors are on offer? User Experience – How user-friendly is the mobile sports betting app?

– How user-friendly is the mobile sports betting app? Promotional Offers – What sort of bonuses and promotions are available for new and continuing players?

Taken together, these criteria give our reviewers a complete picture of what each online bookmaker and their mobile apps offer you as a gambler. We'll go into each below, taking you through what you need to know in order to make the choice that's right for you.

What Mobile Apps Offer

For us, it's incredibly important that mobile apps offer everything that a bookmaker's desktop site would offer. Just because you're betting while on your phone or mobile device, you should be able to accomplish everything you want, and that includes all sports betting markets. The best betting apps in the UK will strive to offer the most complete range of sports markets to bet on, including, of course, football betting and horse racing betting.

You can see above that the best betting apps in the UK will have a huge range of sports for the UK market available for you to place bets on. You should expect all the main functionality of the desktop website, including live betting, convenient payouts, and bet builders.

Mobile Live Betting and Live Streams

Football Live Streams BetVictor Tennis Streams bet365 Basketball Streaming 888sport Darts Live Streams MrMega Ice Hockey App Streams YetiBet

Live betting is at the heart of every online sports betting experience. Using your knowledge of a

sport and paying attention to an event as it evolves, you can place real-time bets to maximise your chances of winning. The best betting apps will have constantly updated, real-time odds on their platforms, and allow you to place bets quickly and efficiently.

Our top betting app picks will also offer live streaming, so you don't have to leave the platform to get updates on how the event is going.

Betting Odds

We consider it important that all the top sports betting apps offer fair and reasonable odds to you, so that you have a reasonable chance of winning your bets. The best bookies will typically work with odds between 93 and 94 percent.

Mobile Sports Betting: User Experience

User experience is key in mobile sports betting as it is in any other app. Just like any other app, each online bookmaker will compete to make the betting experience as quick, convenient, and hassle-free as possible. This means considered design, with simple navigation, and an easy-to-understand interface.

Look and Feel

Well-designed graphics and artwork are a huge part of a good user experience. Mobile betting apps, like all mobile apps, need to have distinctive and attractive art direction. Although each user will have their own individual preferences when it comes to aesthetics, we've tried to give what we consider the most impartial verdict for the best designed apps.

Payment Methods on Sports Betting Apps

Quick, convenient, and hassle-free payment methods are crucial to the mobile betting experience. Striking a balance between being able to get your money in and out of a platform, and making sure you are enjoying the most secure financial protection, is crucial to every

Depositing in Sports Betting Apps

In general, any payment method that is available on an operator's website will be available to mobile users. Sports fans in the UK market are well served by one of the widest range of payment methods, all of which are safe, secure, and well-established in the market. Take a look below at some of the choices available to you.

The Most Popular Mobile Sports Betting Payment Methods

PayPal

Skrill

Sofort

Apple Pay

Phone Bill

Debit Card

Google Pay

Trustly

Bitcoin

Bank Transfer

While we always recommend eWallet solutions such as PayPal, mobile sports bettors might want to take note of some of the mobile-specific payment methods also on offer such as Google Pay and Apple Pay

Payouts on Mobile Devices

Cashing out your winnings is typically done using the same payment method you used to make a deposit. Bear in mind that your chosen payment method might have a defined service time for processing your payout. We advise checking with the help section or customer service of your chosen bookmaker.

Mobile Sports Betting Bonuses

Every bookie will compete to attract new customers with a compelling welcome bonus. Our team have sifted through each one and come up with a list of bonuses that balances fairness and generosity. You can find more information about sports betting bonuses in general in sports betting offers that our team has written.

The above bonuses are some of the best that we've seen for the UK sports betting market. As

mentioned, we think they balance fairness and generosity in their wagering requirements, eligibility periods, and rewards!

Terms and Conditions

We always advise that you read the terms and conditions of any bonus offer, to make sure you don't miss out on any potential winnings. For your convenience, we've listed some of the wagering requirements and eligibility periods in the table above to help you make a choice.

Customer Service

If you need any assistance, it's always reassuring that you can have access to responsive customer service. The best mobile betting apps will have live chat and telephone service, with decent operating hours for reaching a human agent, if not 24/7.

Safety and Security

The UK is one of the safest markets for online gambling and sports betting. On our site we only list reputable, licensed operators, so if you stick to our recommendations, you can be sure of playing in a safe, legal environment.

Safe Betting App Licence from the Gambling Commission

Responsible Gambling Provisions

Safe and Secure Payment Methods Unsafe Betting App No licence to operate

Unrealistic Bonus Terms

No Customer Service

We've listed above just some of the things you should keep an eye out for when picking an operator, as well as some very obvious red flags that might indicate a fraudulent business. In general, though, the online gambling market in the UK enjoys very strong consumer protection and regulation.

Be sure to keep an eye out for a good range of payment methods and visible customer service. In addition, all legitimate casinos and bookmakers will offer responsible gambling resources, such as information on where to get help, as well as options for players to limit their gambling on their platforms.

Mobile Sites vs. Native Apps

These days, there is very little difference in terms of performance between a well-optimised mobile site and a native application. While there might be a slight advantage in performance for a native app, you might want to offset that against the inconvenience of downloading an app and keeping it updated, as well as the variation in user experience.

How to Install a Sports Betting App You have a choice between using an operator's website on your mobile device's web browser, or downloading a native app from your app store. Estimated time: 00:15 Required Devices: Smartphone, Tablet Required Resources: Our guide! – 1. Pick your Bookmaker Pick from our list of top sports betting apps. Be sure to also check out the customer reviews in the app store. – 2. Make sure your phone meets the requirements The app store for your mobile platform will tell you whether your phone meets the minimum requirements. – 3. Download for iOS from the Apple App Store If you're using an iPhone or iPad, you'll need to visit Apple's App Store. – 4. Download for Android from the Google Play Store If you have an Android device, you need to visit the Google Play Store to download your chosen application. – 5. Activate your Welcome Bonus If you are a new customer, you are entitled to a welcome bonus. Make sure to read the terms and conditions of any offer. – 6. Start Betting Once you've registered and logged in, you should be able to start placing your bets! –>

Mobile Betting Apps for iPhone and iPad

If you use an iOS device, you can find your sports betting app in the App store. Almost all bookies will have native apps for iOS available for download, and downloading is as simple as pressing a button.

Sports Betting Apps for Android

Downloading an app for your Android device is just as straightforward as for an iOS device. Simply go to the Google Play Store and you will find the same range of apps as you would on the Apple App Store. We've listed below some of the best sports betting apps available for Android. The Best Android Apps: A Breakdown Android Betting App Current Version Required Android

Version Size YetiBet 1.0.5 8.0 30 MB bet365 8.142.0 8.0 50 MB 888sport 5.3.6 5.0 25 MB

BetTarget 1.0.4 5.0 29 MB BetVictor 6.27.0.16 8.0 40 MB

Above are some of the system requirements and version numbers for the latest sports betting apps available for Android. As long as you have a relatively recent device, you should be able to enjoy native apps on your Android phone or tablet.

Mobile Sports Betting Websites

These days, all websites are designed to work across a multitude of mobile devices without any impact on performance. There are no reputable operators, or indeed really any businesses on the internet that do not follow this fundamental principle.

Advantages No need to download a separate app

Full compatibility across all modern devices

No additional app permissions needed Disadvantages Marginal performance disadvantage on some devices

Less comfortable

No special betting app bonus

With modern processors these days, almost any smartphone made in the past five years will be able to meet the minimum performance requirements for a smooth running, well optimised website, and will definitely be able to run the best sport betting apps natively without issue.

Conclusion: The Best Sports Betting App for the UK

There's never been a better time to get into mobile sports betting in the UK. With mature technical standards and an established market with many great operators, almost anybody with a modern smartphone or mobile device can enjoy the best betting apps. If you're still wondering which operator to go with, check out our team's quick pick below:

YetiBet 5.0 /5 Up to £111 Casino Bonus Fantastic Mobile App

Great Range of Markets

Generous Welcome Offer Visit Site! Full T&Cs Apply! New players only | No restrictions while playing with cash | Min. refund bonus is £10 | Wagering on bonus is 60x | Bonus based on 1st deposit lost | Max bet with bonus is £5 | Skrill and Neteller excluded New players only | No restrictions while playing with cash | Min. refund bonus is £10 | Wagering on bonus is 60x | Bonus based on 1st deposit lost | Max bet with bonus is £5 | Skrill and Neteller excluded

Anybody betting on a mobile platform will have access to all the betting markets that platform offers. Everything, from registration to making your first deposit, placing your first bet, and claiming your first winnings, should be as simple and straightforward as it would be on a desktop site.

Frequently Asked Questions

Nvidia en el camino a los R\$4tn: la IA y la visión de Jensen Huang

Cuando Jensen Huang, director ejecutivo de Nvidia, habló en la reunión anual de accionistas la semana pasada, no hizo mención de la caída en el precio de las acciones.

La empresa estadounidense de chips, impulsada por su papel clave en el auge de la inteligencia artificial, había alcanzado brevemente el valor de mercado más alto del mundo el 18 de junio, pero la corona se deslizó rápidamente. Nvidia perdió alrededor de R\$550.000 millones (£434.000 millones) desde el pico de R\$3.4tn (£2.68tn) del valor de mercado que había alcanzado aquella semana, ya que los inversionistas en tecnología, combinando las ventas con dudas sobre la sostenibilidad de su crecimiento récord, aplicaron los frenos.

Sin embargo, Huang habló como el CEO de una empresa que pasó de una valoración de R\$2tn a R\$3tn en 30 días de este año y ve R\$4tn a la vista.

Describió una próxima generación de poderosos nuevos chips, llamados Blackwell, como potencialmente "el producto más exitoso en nuestra historia" y quizás en toda la historia del computador. Agregó que la nueva ola para la IA sería la automatización de R\$50tn de industrias pesadas y describió lo que sonaba como un bucle sin fin de fábricas robóticas que orquestan robots que "construyen productos que son robóticos".

Resumiendo, dijo: "Hemos reinventado Nvidia, la industria informática y muy probablemente el mundo".

Estas son las palabras en las que se construye una valoración de R\$4tn y el ciclo de la euforia de la IA. Las acciones de Nvidia están recuperando terreno, regresando por encima de R\$3tn esta semana, porque sigue siendo la mejor manera de comprar acciones en el auge de la IA. ¿Es eso suficiente para impulsarlo a R\$4tn a pesar de la emergencia de la duda de los inversionistas?

'Hemos reinventado Nvidia, la industria informática y muy probablemente el mundo', ha dicho Jensen Huang.

Alvin Nguyen, analista senior en la empresa de investigación Forrester, dijo que "solo el colapso del mercado genAI" impediría que Nvidia alcanzara los R\$4tn en algún momento, pero si llegaba allí primero antes que los rivales tecnológicos era otra historia. En la actualidad, Microsoft, otro gran jugador en IA, y Apple ocupan el primer y segundo lugar respectivamente en términos de tamaño de mercado, con Nvidia en tercer lugar.

Si el próximo gran modelo de IA de OpenAI, GPT-5, y otros nuevos modelos son asombrosos, el precio de las acciones seguirá siendo robusto y podría llegar a R\$4tn para fines de 2025, dijo Nguyen. Pero si decepcionan, entonces el precio de las acciones podría verse afectado, dado su estatus como portaestandarte de la tecnología. Un avance tecnológico podría resultar en que se necesite menos potencia informática para entrenar modelos, agregó, o el interés de las empresas y los consumidores en herramientas de IA generativas podría ser menos robusto de lo esperado.

"Hay mucho desconocido y fuera del control de Nvidia que podría afectar su camino a los R\$4tn", dijo Nguyen. "Como la decepción con los nuevos modelos que salen, las mejoras en los modelos que reducen las necesidades informáticas y la demanda más débil de lo esperado de las empresas y los consumidores por los productos genAI".

Los laboratorios de IA privados como OpenAI y Anthropic, las entidades detrás de los chatbots ChatGPT y Claude, no se negocian en los mercados públicos, dejando vastas cantidades de dinero flotando en cuentas de inversionistas sin forma de acceder a algunos de los principales actores en la fiebre de la IA generativa.

Comprar acciones en multinacionales como Microsoft o Google ya es caro y solo una fracción de una inversión está relacionada con la nueva cosa caliente. Podría haber un auge de la IA, pero si, por ejemplo, el negocio de anuncios de búsqueda de Google se tambalea como resultado, entonces la empresa no necesariamente será un ganador neto.

Nvidia, por el contrario, vende picos en una fiebre del oro. A pesar de años de inversión en capacidad, continúa vendiendo sus chips de gama alta más rápido de lo que puede fabricarlos. Grandes proporciones de las inversiones en la investigación de IA de vanguardia fluyen directamente desde los laboratorios y en las arcas de Nvidia, con empresas como Meta que se han comprometido a gastar miles de millones de dólares en la adquisición de cientos de miles de GPU de Nvidia (unidades de procesamiento gráfico).

Ese tipo de chip, la especialidad de la empresa, una vez se vendió para permitir que los jugadores experimentaran gráficos nítidos y suaves en juegos 3D, y a través de un golpe de suerte monumental, resultó ser exactamente lo que los investigadores necesitaban para construir sistemas AI masivos como GPT-4 o Claude 3.5.

Las GPU pueden realizar, en gran volumen y velocidad, los cálculos complejos que subyacen al entrenamiento y el funcionamiento de herramientas AI como chatbots. Por lo tanto, cualquier empresa que desee construir o operar un producto AI generativo, como ChatGPT o Google's Gemini, necesita GPU. Lo mismo ocurre con el despliegue de modelos AI disponibles públicamente como Meta's Llama, que también requiere cantidades masivas de chips como parte de su fase de entrenamiento.

En el caso de los sistemas conocidos como modelos de lenguaje grande (LLMs), el entrenamiento implica procesar bloques masivos de datos. Esto enseña al LLM a reconocer patrones en el lenguaje y determinar qué debería ser la próxima palabra o frase en respuesta a una consulta de chatbot.

Nvidia nunca ha dominado por completo el mercado de chips de IA, aunque. Google siempre se ha basado en sus propios chips, que llama TPUs (por "tensor", una característica de un modelo de IA), y otros quieren unirse a él. Meta ha desarrollado su Meta Training and Inference Accelerator, Amazon ofrece sus Trainium2 chips a las empresas que utilizan AWS (Amazon Web Services), y Intel ha producido el Gaudi 3.

Ninguno de los principales competidores compite con Nvidia en la parte superior del escalón en

este momento. Pero eso no es el único lugar donde se está produciendo la competencia. Un informe de The Information, un sitio web de noticias tecnológicas, destacó el auge del "procesamiento por lotes", que ofrece a las empresas un acceso más económico a los modelos de IA si están bien con esperar a que se ejecuten sus consultas en períodos de baja demanda. Eso, a su vez, permite a los proveedores como OpenAI comprar chips más eficientes y baratos para sus centros de datos en lugar de enfocar todo su gasto en el hardware más rápido posible. después de la promoción de boletines

En el otro extremo, las pequeñas empresas están comenzando a ofrecer productos cada vez más especializados que superan lo que Nvidia puede proporcionar en una carrera cara a cara. Groq (no confundir con el similar nombre de Elon Musk's Grok AI, el lanzamiento del cual provocó una disputa de marca en curso) hace chips que no se pueden usar para entrenar IA en absoluto, pero que ejecutan los modelos resultantes a una velocidad fulgurante. No ser superado, la startup Etched, que acaba de recaudar R\$120m, está construyendo una placa que solo ejecuta un tipo de modelo de IA: un "transformador", la T en GPT (transformador generativo preentrenado).

Jensen Huang, el CEO de Nvidia, dijo que la empresa estaba 'automatizando R\$50tn de industrias pesadas'.

Nvidia no solo necesita mantenerse al día con la competencia, grande y pequeña. Para llegar a la siguiente marca, necesita prosperar. Los fundamentos del mercado están fuera de moda, pero si la empresa se valorara como una empresa tradicional de baja crecimiento, incluso una capitalización de mercado de R\$3tn requeriría que vendiera un billón de sus GPU de gama alta al año, con un margen de ganancia del 30%, para siempre, señaló un experto.

Incluso si la industria de la IA crece lo suficiente como para justificar eso, el margen de ganancia de Nvidia puede ser más difícil de defender. La empresa tiene los diseños de chips para mantener el liderazgo, pero los cuellos de botella reales en su cadena de suministro son los mismos que para gran parte de la industria: en las fundiciones de semiconductores avanzadas, como las operadas por TSMC de Taiwán, Intel de EE. UU., SMIC de China y unos pocos otros en el mundo. Notablemente no está en esa lista Nvidia, que es un cliente de TSMC.

No importa cuán avanzados sean los conjuntos de chips de Nvidia, si necesita comer en el libro de pedidos de TSMC para igualar la demanda, entonces inevitablemente fluirá la utilidad de esa manera también.

Neil Wilson, el analista principal de Finalto, el corredor de bolsa, dijo que el caso bajista contra Nvidia, o argumento para una caída sostenida en el precio de las acciones, se basa en la idea de que una vez que la empresa trabaje a través de su libro de pedidos, volverá a niveles menos frenéticos de demanda.

"Todos sus clientes han estado acudiendo en masa a pedir los GPU, pero no lo harán para siempre", dijo Wilson. "Los clientes sobreordenan y luego comienzan a cancelar. Es un punto dulce ahora, pero no se puede mantener". Puede ver a Nvidia llegando a R\$4tn y más allá, pero "tal vez no al ritmo actual".

Jim Reid, el jefe de investigación económica y temática global de Deutsche Bank, publicó una nota esta semana preguntándose si Nvidia era "la empresa de más rápido crecimiento de todas las épocas". Al señalar que Nvidia pasó de R\$2tn a R\$3tn en 30 días, Reid dijo, por el contrario, que le tomó a Warren Buffett 60 años acercarse a Berkshire Hathaway a R\$1tn.

Sin embargo, en un mundo de baja productividad, una medida de eficiencia económica, y poblaciones de trabajadores en declive y deudas gubernamentales en aumento, la promesa económica de la IA es bienvenida, dijo Reid.

"Si la IA es el catalizador de una cuarta Revolución Industrial, eso sería muy buenas noticias", escribió. "Si no, los mercados tendrán un gran problema".

Está en juego más que ganar una carrera a R\$4tn.
