2006 video game

2006 video game

Black is a 2006 first-person shooter video game developed by Criterion Games and published by Electronic Arts. It was released for the PlayStation 2 and Xbox in February 2006. The player assumes control of Jack Kellar, a black ops agent being interrogated about his previous missions

involving a terrorist operation. Gameplay involves players confronting enemies by using firearms and grenades. The game is notable for its heavily stylized cinema-inspired action as well as its sound quality and focus on destructive effects during gameplay.

Black received generally positive reviews upon release. Critics praised the gameplay, sound design and presentation, but criticized the game's short length and lack of multiplayer. Despite Criterion's desire to develop a sequel, creative differences with Electronic Arts ultimately ended plans for one. As such a spiritual successor, *Bodycount*, was created by the same developers at Codemasters and released in 2011.

Story [edit]

Black is set in Ingushetia and Chechnya, Russia. The protagonist is Sergeant First Class Jack Kellar (Marty Papazian), an inadequately disciplined member of a CIA black ops unit. The unknown interrogator (Paul Pape) questions Kellar about an arms smuggling terrorist organization and gang called the Seventh Wave who have been responsible for a number of terrorist attacks and homicides. Kellar is soon shown that, unless he co-operates, he and his actions will be declassified, meaning he will be convicted at court-martial, dishonorably discharged, and imprisoned for life. Though initially resistant, Kellar agrees to tell his story.

Four days earlier, Kellar and his military unit were attacking a Seventh Wave stronghold in the city of Veblensk. Kellar kills three high-ranking members of the cell but then disobeys orders by rushing inside a terrorist controlled building, where a hitman suddenly ambushes him. However, this hitman did not cause Kellar's demise, and Kellar learns that his captor is an American, William Lennox, a former CIA network operative. After faking his own death in Cairo, Lennox has apparently become the leader and gang boss of Seventh Wave.

Kellar's next mission is to cross the border into Treneska and traverse the Vlodnik Canal to destroy a base and weapons cache. He then meets a female black ops soldier named MacCarver (Cree Summer), the commander of black ops Team Bravo, after fighting a wave of terrorists at a farmhouse. Kellar and MacCarver then move to destroy an arms factory in the city of Naszran. To complete the mission, they must navigate an old graveyard and town, both heavily defended. After doing so, they assault the town's iron foundry, destroying its productive capacity. They then meet a third member of the team, Solomon.

They learn that Valencio, one of the four bosses of Seventh Wave, is hiding in Tivliz Asylum. The team decide to attack the asylum yard, with Keller rushing into the asylum despite Solomon protesting that their order was to hold. Keller finds Valencio after blowing up a concrete machine gun nest and briefly interrogates him for Lennox's location.

Based on information gathered from the mission, Team Bravo proceeds to a well-defended dockyard, clears the area, and links up with Alpha Team. Alpha Team, however, is destroyed in an ambush while Lennox escapes. In light of the disastrous result, the operation is declared cancelled. Despite this, Kellar leads a retaliatory assault against the Graznei Bridge before leaving his team at the gates of Lennox's compound to successfully penetrate the defenses both around and inside the Spetriniv Gulag. During the attack, Keller triggers an explosion resulting from the destruction of two concrete barricades, and subsequent explosions in the final room of the underground bunker, presumably killing Lennox.

The interrogator then reveals to Kellar that authorities had, in fact, always known of Lennox's involvement in Seventh Wave. Kellar had acted predictably, doing what his profile said he would, while his pursuit of Lennox was both expected and welcome - but Lennox is not in fact dead. Kellar is told that a false "death" in a car crash has been arranged for him to provide cover so he could continue his pursuit of Lennox. The game ends with Kellar being told to get ready for his next assignment.

Gameplay [edit]

The player, armed with a SPAS-12, faces multiple enemies on the Naszran Foundry chapter. The red crescents in the center of the screen indicate that he is taking damage from multiple angles. The gameplay is essentially a straightforward first-person shooter. Players can only carry two weapons at a time; therefore, strategy is needed when choosing weaponry, with weapons differing in characteristics. The player can also carry grenades, which can be thrown without

switching weapons. Land mines and grenades can be detonated prematurely by shooting them. The game is mission-based, with each mission separated by a cut scene video. On harder difficulties, there are more objectives that must be completed before the player can progress. These extra objectives involved collecting various intelligence documents, blueprints, or destroying parts of the environment. These are all indicated by the HUD cross-hair changing color when the player points at the relevant object.

Successful completion of the objectives over all missions in all difficulties above 'Easy' results in the awarding of Silver Weapons (infinite bullets) and unlocking the M16-A2 (40mm underslung grenade launcher attachment) as the starting default weapon with infinite 40mm grenades. When unlocked, these features are permanent and cannot be removed without starting a fresh storyline.

Development [edit]

Criterion intended to "do for shooting what Burnout did for racing - tear it apart",^[1] with dual emphasis on destructible environments and the handling and behavior of real-world firearms. Bullets that hit buildings, terrain and objects leave visible damage; moreover, the guns are rendered with great detail and accuracy, though some weapons' features are stylized or exaggerated.^[2] The emphasis on the appearance, function, and sounds of the weapons led the developer to label the game as "Gun-Porn".^[3] Another notable and original feature is the use of real-time blur while reloading, giving a depth of field and more perspective to the game. Similarly, when the player drops below two bars of health, the screen turns black and white, the sound of the character's heartbeat become the dominant noise and the game goes into slow motion, and the large and small motors in the control pads match the sound of systolic and diastolic part of the heartbeat.

The game was not developed with an overarching plot structure in mind and this was implemented as something of an afterthought towards the end of development. The initial idea for relating the plot in-game came from Black's director, Alex Ward, who wanted to have a radio-play-style voiceover spoken over a 'black' screen.

Sound [edit]

Emphasizing the game's action film heritage, sound effects for the weapons in the game were based on various sounds from films. For example, Bruce Willis' Heckler & Koch MP5 in Die Hard, Jack Bauer's pistol in 24, and Arnold Schwarzenegger's Uzi in True Lies.^[4]

Realizing in the chaos of a heavy gun battle the heavy mix of sound and music would produce a cacophony of noise, the sound designers developed the "choir of guns" concept. Whereas, traditionally in a shooter game, each weapon model would be assigned a different sound, Black assigns each enemy their own "voice", similar to the way in which each member of a choir would have their own distinct voice. For example, there are three enemies firing, one would be assigned a low voice, another a medium voice, and the third a high voice. This allows all the weapons being fired in any particular scene to harmonize and deliver a distinct sound for the game. Black's sound was nominated for Best Audio at the 2006 BAFTA Video Games Awards, and won Best Art & Sound jointly with Burnout Revenge (another game by Criterion) at the 2006 Develop Industry Excellence Awards.^[5]

The music for Black was composed by Chris Tilton, using a theme co-authored with Oscar-winning composer Michael Giacchino. It was recorded at the Newman Scoring Stage.^[6]

Reception [edit]

Black's PlayStation 2 version received a "Gold" sales award from the Entertainment and Leisure Software Publishers Association (ELSPA),^[27] indicating sales of at least 200,000 copies in the United Kingdom.^[28]

Black received "favorable" reviews on both platforms according to video game review aggregator Metacritic.^{[25][26]}

In Japan, Famitsu gave the PS2 version all four eights, for a total of 32 out of 40.^[11] The Times also gave the game four stars out of five and stated: "As the entire game is played at fever-pitch, you soon find yourself looking forward to the next mission briefing, if only for a chance to catch your breath. The only mystery to Black is why there is no multiplayer mode, since such intense battle settings would make for great competitive bouts".^[24] The Sydney Morning Herald similarly

gave it four stars out of five: "Little strategy is required for each stage, with abundant health packs and aggressive opponents of little intelligence. But there are many strategies and the use of cover is vital".[29] Detroit Free Press gave the Xbox version three stars out of four and said: "The action is intense and the effects are splendid, though the un-reality applies also to the worlds in which you battle".[23] However, The A.V. Club gave the game a C+, stating that it was worth playing for "six hours. Pretty good hours, but still, The A.V. Club can't stress that number enough"; and added "that was awesome for Doom, a free download with 16 extra maps available after registration. But 40 bucks for Black's eight levels, with no multiplayer mode, and unlockable difficulty settings the only incentive to replay? The question is really whether renting this lovely oversized tech demo is worth a whole weekend".[30]

During the 10th Annual Interactive Achievement Awards, the Academy of Interactive Arts & Sciences nominated Black for "First-Person Action Game of the Year" and "Outstanding Achievement in Original Music Composition".[31]

In 2013, IGN listed the game at 99 in the list of "Top 100 Shooters".[32]

Future [edit]

In an interview, co-creator and designer Stuart Black revealed that plans for a sequel were underway, but are now scrapped due to differences with Electronic Arts. Stuart Black and many of the developers of Black worked on the now released Bodycount; a spiritual successor to the game which, developed by Codemasters, was released on the PlayStation 3 and Xbox 360 during Q3 2011.[33][34]

Emmanuel Macron choca a Francia con eleições antecipadas

O primeiro-ministro foi um dos últimos a saber. Assim de sigilosa, confinada a um pequeno grupo de assessores, foi a decisão do presidente Emmanuel Macron de dissolver o Parlamento e convocar eleições legislativas na França.

Gabriel Attal, de 35 anos, era um dos favoritos pessoais, o "prodígio" de Macron, quando o presidente o nomeou primeiro-ministro bullsbet 777 janeiro. No entanto, apenas alguns meses depois de confiar a Attal a tarefa de revitalizar seu governo, Macron o ignorou ao considerar uma das decisões mais importantes de bullsbet 777 presidência: se convocar uma eleição no

momento bullsbet 777 que o Partido Nacional de Rali Anti-imigração havia se elevado.

O estilo de Macron sempre foi intensamente top-down, mas nesta ocasião ele jogou com a possibilidade de trazer o até então impensável na forma de um governo de extrema-direita. O pequeno grupo que decidiu era tão isolado que mesmo muitos de seus ministros e apoiadores ficaram atordoados com bullsbet 777 disposição a correr um risco tão grande.

Um jogo de risco

Macron, se definindo como um "otimista incorrigível", insiste que teve que convocar a eleição, o que o deixaria como presidente, mas poderia forçá-lo a compartilhar o poder com seus oponentes acérrimos por mais três anos de seu mandato. Sua palavra favorita agora é a "clarificação" que, segundo ele, apenas uma votação nacional pode entregar. Após a derrota de seu partido nas eleições do Parlamento Europeu para o Partido Nacional de Rali de Marine Le Pen, continuar como se nada tivesse acontecido seria mostrar desprezo pela democracia, disse a jornalistas. No entanto, nada o obrigava a realizar uma eleição antecipada, apenas semanas antes dos Jogos Olímpicos de Paris, que poderia trazer o nacionalismo direito ao poder.

“Ele jogou roulette russa com a França”, disse Célia Belin, pesquisadora sênior da European Council on Foreign Relations bullsbet 777 Paris. “Isso é próximo do imperdoável.”
