GAME Roulette is a game of chance. It uses a spinning wheel with either 37 or 38 numbered pockets. The roulette wheel is spun one way and a ball is sent round the other way. Roulette can be played in person at real tables. You can check out the best online roulette Australia casinos according to SmartPokies, if you prefer an online option. Before the wheel is turned, players bet on where the ball will land. There are lots of different ways to do this including the highest paying online casino, and the chances of winning and the payouts vary. The first recognisable roulette game was played in a Paris Casino in 1796. The game is designed to give the casino an edge - in other words, over a long time players should lose slightly more than they win. That's how casinos can afford to have lots of smart people in suits standing around saying "Good evening Mr Bond". La Makanerie Fabulous scarves made from sustainable materials inspired by tales of women in the Mediterranean region. Unlike Mr. Bond however, the casino is not always invincible. We're going to look at the maths behind roulette, and how new online casinos such as the ones listed at TheCasinoDB gain their advantage and how you can gain yours! Never played exclusive roulette online before? Visit casinos at [toponlinecasinoaustralia](http://toponlinecasinoaustralia) now and make your first roulette bet online! Here's how the sums work:

EUROPEAN TABLES (single zero) Most European roulette tables have 37 holes numbered 0-36. The 0 is coloured green, the other numbers are red or black (18 of each). There are lots of places to play online roulette. Pokieslab grants instant access to Australian Online Casinos 2024 with free spins so you can try the latest online pokies in Australia for real money with no deposit and no downloads required. One bet is to pick any single number. This pays out 35/1. Therefore if you put 1 on it and your number comes up, you will receive your winnings of 35 plus your original 1 = 36 in total. However the chances of winning are 1/37 because there are 37 numbers and only one winner. This means if you play 37 times, it will cost you 37, and on average\* you should win once which will give you 36. In other words, if you play for years and years, for every 37 you bet, you'll get back 36. The simplest way to show this is to put 1 on every number, so that's 37 in total. Spin the wheel. The winning number will give you 36 back, the rest all lose, so you're 1 down. The house wins 1 out of every 37

bet which is 2.7%. It might not sound like much, but when big money is flying around, it soon adds up! Click here for a list of UK casinos. \* There is NO guarantee you will win one time every 37 games! You might not win any, or if you're very lucky you might win two or more. It's like throwing a dice six times. On average you should get one six, but you might get more, or you might get none. Another common bet on roulette is Red/Black. This pays out 1/1 (or evens), so if you put 1 on red and it wins, you get 1 plus you get your original 1 back = 2 in total. Your chances of winning are 18/37 because there are 18 red numbers out of the total 37. If there was no ZERO hole, then the chances would be 18/36 = 1/2. It would be an even bet and you should win exactly as much as you lose. However the ZERO will come up about 1/37 times, so neither red or black win. Once again, this gives the house a 2.7% profit. Understanding the maths involved adds to the fun when playing foreign online casinos for Finnish players.

Among

the various online or offline casino games to choose from, players in Australia generally prefer playing online pokies (how they call slots in Australia).

#### OTHER BETS

Players put their bets on a cloth known as the layout. Here we've put a selection of markers out. The table shows the chances of winning, and the payout. What's the bet? Win chance Payout A Single bet on number 6 1/37 or 2.7% 35/1 B Split bet on 26 and 29 2/37 or 5.4% 17/1 C Triple bet on 13,14,15 3/37 or 8.1% 11/1 D Triple bet on 0,2,3 3/37 or 8.1% 11/1 E Four-way bet on 19,20,22,23 4/37 or 10.8% 8/1 F Six-way bet on 28,29,30,31,32,33 6/37 or 16.2% 5/1 G Bet on all numbers 1-12 12/37 or 32.4% 2/1 H Bet on all numbers in centre column (not zero) 12/37 or 32.4% 2/1 I Bet on all numbers 1-18 18/37 or 48.6% 1/1 J Bet on all black numbers 18/37 or 48.6% 1/1 K Bet on all odd numbers 18/37 or 48.6% 1/1 ZERO is not odd or even, and is not black or red! Now that you know some basics of the betting layout and outcome of bets, you can try your hand out at some roulette games online. The best way to start is to look at minimum deposit casinos for roulette, where you have several options with which to begin your roulette journey.

AMERICAN TABLES (double zero) If the European tables didn't have the green zero pocket, then there would be no profit for the Casino. American tables have a second green pocket, the double zero. This doubles the profits! In practice, you can test this feature on the following demo games: //roulette77.us/american-roulette Some places do play special rules regarding these zero pockets, e.g. if you bet on all the odd numbers and zero or double zero comes up, they only take half your money. How nice of them!
