The process predates written history, and was first done by hand and with sticks. Spinning wheels are believed to have originated in India between 500 and 1000 A.D. By the 13th century, they were seen in Europe and were a standard piece of equipment for those making fiber into yarn.

The spinning wheel was probably invented in India, though its origins are obscure. It reached Europe via the Middle East in the European Middle Ages.

Don't be intimidated by all the betting options in Online Roulette. It's actually an easy game to learn, and all the betting options will keep it interesting and exciting, no matter how many games you play.

If you're new to the game, it's important to know the basic flow.

Make your bet. We'll go over the betting options below.

Click on the "Spin" button.

The Roulette ball, or pill, will be dropped onto the spinning wheel.

The ball will bounce around the wheel before coming to rest in one of the numbered pockets.

If the ball lands in a pocket that you bet on, you'll win. The payout will depend on your bet.

Begin the next hand by either selecting re-bet, double, or place a new bet.

The betting table is broken up into two parts, known as Inside and Outside bets.

The outside bets are logical groupings of numbers. These include betting on red or black, all the odd or even numbers, numbers 1-18 or 19-36, and dividing the numbers into thirds for a bet.

The inside bets are where you'll see all the red and black numbers that match up with what is on the wheel. There is a total of 7 inside bets, which include betting on a specific number, betting on a corner, or other specified

groupings. Inside bets have lower odds - but higher payouts - than outside bets.

There

are two types of Roulette wheels. The standard one is known as the Single-Zero or European Roulette wheel. This wheel will have one green zero pocket, and the '50/50' bets have a small 2.70% house edge. The Double Zero or American Roulette wheel has two green Zero pockets. This nearly doubles the house edge to 5.26%.
