The casino was founded to provide top-notch games of chance, exciting tournaments, and great payoffs. To meet the demands of its expanding user base and growing competition, 7Signs has emphasized enhancing user experience.

Customer Journey Mapping and Empathy Mapping:

Our team of professionals carried out in-depth interviews and surveys with active and potential customers to create customer journey and empathy maps. The surveys used by 7Signs helped us comprehend their difficulties, anxieties, happiness, and loyalty for the casino. Multiple phases were then identified using the customer mapping method in order to describe the user experience and pinpoint touchpoints. Discovering their motivations, emotions, thoughts, pain points, decision-making processes, requirements, and collecting experiences during the consumer trip is the aim. The client journey and empathy maps improved the user experience and identified the most significant improvement areas for 7Signs Casino's. Better user experience design was one such area, necessary for boosting engagement and visitor retention within the website.

Implementation:

Because the research indicated that having a site that is aesthetically appealing, user-friendly and straightforward to explore is crucial for having a great user experience, the design of the website where the user experience should take precedence. Our design staff emphasized developing a tidy, contemporary website that makes it simple for visitors to explore, find what they are looking for, and have fun. We divided the users into personas based on their actions to make information simple to find and navigate. Another region that was in urgent need of improvement was user onboarding, which had to be revamped to suit users' needs with easily controlled onboarding since users complained about having a lengthy and complex registration process. By making the onboarding process more efficient and eliminating invasive processes, customer dissatisfaction was also reduced. Moreover, 3 short educational films lasting 90 seconds each were produced, illustrating ways of playing blackjack, Texas hold'em, and live casino games. Customers were thrilled to watch them since they were concise and clear. These initiatives improved empathy and customer onboarding, establishing user trust with 7Signs Casino.

The casino took action to enhance user interface design so that problems like a crowded layout and challenging navigation may be resolved in relation to color options, visual features, etc. In order to provide an improved user experience, personalization was accomplished through user customization, choice-customization, outcomes decided by the user, gamification, impact choice by players, and experiences offered to all players based on user playing. It was done in accordance with client preferences because we made sure the bonuses meant something to all.

Results:

In terms of conversions, revenue, and customer satisfaction, 7Signs Casino experienced outstanding results following the enhancements made to improve user experience. By enhancing the website, we increased customer satisfaction with the user experience and engagement by at least 30%. Customers found both the new hassle-free onboarding simple and effective. Due to the films' clarity and simplicity, there is now more thoughtful decision-making behind customer wagers, resulting in an increase in initial and recurrent deposits of a minimum of 20%.

Personalization helped the establishment of loyal consumer connections which is helping boost brand loyalty, therefore increasing regular deposit shares and reducing churn by at least 60%.

Users enjoyed enhanced UX as a result of tailored promos and experiences, which led to increased first-time and repeat purchases of 50% or more and a reduction in complaints of inadequate gamification and prizes (10% more).

Case owner suggestions:

Invest in knowledge and perception to fully understand the requirements and desires of an expanding user base to develop efficient tactics and mechanisms.
