First, I found it interesting that Bet365 only accepts Pix for deposits and not for withdrawals. It's good to know that they have implemented this feature to make it easier for players to deposit funds, but it would be even better if they could also accept Pix for withdrawals, as this would make the process much smoother and more convenient for players.

The article also provides a clear and concise walkthrough of how to make a deposit using Pix. It's clear that the process is quite straightforward, involving generating a QR code that can be scanned using a bank app, and then funds are immediately credited to the player's account. It's also reassuring to know that the payment is processed instantly, so there's no waiting around for the funds to clear.

I also appreciated the section on compatible banks, as this is useful information for players who may be considering using Pix on Bet365. It's good to see that major banks such as Bradesco, Banco do Brasil, and Itaú are compatible, as well as digital banks like Nubank, Banco Inter, and Original. It's also worth noting that while withdrawals are not available through Pix, players can still request a withdrawal via bank transfer, which takes a few days to process.
