A scene from The Pelayos, with the actors Lluís Homar and Daniel Brühl seated at the table.

Gonzalo García-Pelayo's winning racehorse 2 is named Going Wrong, and bets are 12 to 1 just before the race at the tracks in Cheltenham, UK. 2 The 450 euros that he has put down on the

jockey in the green-striped shirt is part of a "private 2 investment fund" which relies on tipsters and earns him a 30-percent annual return. Just then, his cellphone vibrates: it's a 2 text from another

tipster. In the match between Fernando Verdasco and Juan Martín del Potro, he should bet against the 2 Argentinean tennis player winning more than four games against the Spaniard.

García-Pelayo then explains that he is in the process 2 of creating a new formula for tennis bets based on the theory that if the pre-match favorite favorite loses the 2 first set, he or she will win the second. If his studies prove conclusive, he will program it on his 2 computer, under "Favorite loses first set" so it automatically launches.

The race starts at Cheltenham. García-Pelayo leans back on his office 2 chair, watching the screen with the remote in his hand. It's mid-afternoon on a Tuesday in March, and the gambler 2 is dressed in cords and checkered shirt. His white beard and hair are disheveled, his reading glasses hang from his 2 neck. His desk is covered in several layers of dust and papers scribbled with formulas and numbers - their degree 2 of yellowing is a like a scale that reflects the strata of his life as a gambler.

This is more or 2 less the position in which he spends his days at home in Madrid, although he does inch closer to the 2 screen in order to determine the exact placement of his horse (Going Wrong seems to be in third place, maybe 2 second; it's hard to tell on the small screen).

At times he gets up to check the other four computers he 2 has placed in various rooms in his house. They are all buzzing with their own activity, offering players from all 2 over the planet bets that he has programmed. An electronic cry of "Goal!" can be heard every so often from 2 one of them, announcing a new development in the ongoing Debrecen-Kaposvár game in the Hungarian League. The software immediately updates 2 itself, offering 2.6/1 that it will be four-goal match.

Soccer is the axis upon which García-Pelayo's private fund rotates. His 2 computers offer 200 bets daily, from which he expects to earn some 15,000 euros a month, part of which will go to the investors and the remainder to a retirement fund. It took him a year to study how and what to program: "a degree in sports betting," he calls it. Though he will be 65 in June, there are a lot of unexplained gaps on his résumé.

Gonzalo García-Pelayo posing with his wife and children on working vacations in Las Vegas. Gonzalo is the patriarch of the Pelayo clan, a family who shot to fame in the 1990s for designing a statistical-based method for winning on the roulette wheel. According to the family's estimates, they won some 250 million pesetas (1.5 million euros) between 1991 and 1995, mainly in the Madrid Gran Casino - their "greatest enemy" but also the "laboratory" in which they tested their system. So Gonzalo and his son Iván wrote in *La fabulosa historia de los Pelayo* (or, *The fabulous history of the Pelayos*), published by Plaza y Janés.

Their discovery was accidental. Gonzalo had sent his nephew to the casino to learn the ways of the croupiers. He wanted to study their "ways of dropping" in the hopes of determining a pattern in the path, bounces and final resting place of the ball. His nephew took down numbers and dealers' names; Gonzalo analyzed the data on a program on his computer. That was when he discovered that some numbers come up a lot more often than others, a tendency that had nothing to do with the dealer and everything to do with defects in the manufacture and leveling of the tables. His hypothesis: "If Swiss watches and NASA rockets have imperfections, then so do roulette wheels."

His computers offer 200 bets daily; he expects to earn €15,000 a month

These were the times of the get-rich-quick schemes, of the Seville Expo and the Barcelona Olympics. The patriarch decided to try his luck at roulette following a series of business failures, he recalled recently in an interview along with his children, Iván and Vanessa. He has tried his hand at most everything: from radio announcer to matador manager. In the 1970s, he had a go at the movie industry. His second movie, *Vivir en Sevilla* (or *Living in Seville*, 1979) received the following review from critic Fernando Trueba: "Clumsy dialogue and too calculatedly avant-garde." Next, García-Pelayo opened a nightclub in Seville, where as DJ, he played Pink Floyd and Frank Zappa. He went underground after a judicial order closed the establishment down on rumors that minors were using drugs in its backrooms. He moved onto the recording industry, discovering artists such as Triana and María Jiménez. In total, he left his signature on some 130 albums, including some by Luis Eduardo Aute, Gato Pérez and Joaquín Sabina. The latter singer dedicated a few lines to García-Pelayo in his well-known song, *19 días y 500 noches* (or, *19 days and 500 nights*), including: "Yesterday, the doorman threw me out of the Torrelodones casino."

García-Pelayo branched out into producing TV programs, and had a few hits, but he shut down his company after he was accused of fleeing to Brazil, he says, and by that point, they were no longer taking his calls in the music world. So he started looking for a new gig, "beyond the limits of luck," as he calls it.

After his first few hypotheses on roulette tendencies, García-Pelayo formed a team led by his son, Iván, a recent philosophy graduate and musician (he composed *Africanos en Madrid* (or, *Africans in Madrid*)). There wasn't anybody over 26 years old in the first group. Though the figures and dates are now blurred, as often occurs in legends, after a "few months" recording numbers and working with the data, betting began in earnest in the fall of 1991. According to the book, they won close to "a million pesetas a day" in the first month. They played every day, from 5pm to closing. "A blue-collar job, not at all glamorous, with 12-hour days," says Iván. "And on your feet the whole time," adds his sister, Vanessa.

They are interrupted by the sound of their father's cellphone ringing - the Beatles' Eleanor Rigby is the ring tone, and he comments that he would like to see a movie which portrays his clan like the Liverpool quartet, with "producer Phil Spector hovering in the background." That role is actually played by actor Lluís Homar, the spitting image of García-Pelayo. And the preceding scenes, or a version of them, kick off *The Pelayos* by director Eduard Cortés (the movie premieres on April 27). "We are the Pelayos, and we have the opportunity to do something extraordinary: 2

break the bank in a casino," says actor Daniel Brühl (Good Bye, Lenin!) in the role of Iván.

"This is a 2 classic story: the dream of a handful of social pariahs whose rival is big business," enthuses the director, who fell 2 under the family's magnetic spell after living with them for a period.

If Swiss watches and NASA rockets have flaws, then 2 so do roulette wheels"

Though the film mixes fact and fiction, the script accurately reflects the clan's hostility toward the managers 2 of the Torrelodones casino. "Every great feat has a great enemy," say the Pelayos today (and in the book: "We 2 relish our detestation for the casino managers in the way that a boxer finds strength in his hate for his 2 opponent"). The family was involved in long-drawn-out court case against these executives that started when they were kicked out of 2 the establishment in 1992 for committing what the casino termed "gaming irregularities." The battle ended with a Supreme Court sentence 2 in 1994 that recognized the legitimacy of the Pelayos' methods and even praised their "inventiveness."

The bad guy in the movie 2 is a malicious casino manager called La Bestia (The Beast), played by Eduard Fernández. The movie doesn't say which casino 2 he works for, but all of this attention has understandably caused concern (and anticipation) among management at the Madrid casino, 2 who were not consulted by the movie's scriptwriters.

"We don't have anything against anybody," says the casino's communications director, his voice 2 mingling with the sounds of chips falling in the European Room at Torrelodones. "The Pelayos really are not part of 2 our everyday conversations around here. They represent just another story among the more than 18 million visitors we get here. 2 We looked into whether they had some sort of advantage over the other players, and we fixed the imperfections in 2 the tables."

He tiptoes around the subject of the expulsions. He doesn't know what the family's total winnings amounted to. He 2 says they never - "no way" - broke the bank. Jesús Marín, pit boss in the time of Pelayos, and 2 current games director, adds, "They never played a lot of numbers, and they always played the same ones. They usually 2 won, but their story has been exaggerated. It was immediately discovered that the roulette tables had a pattern; so first 2 the wheels were switched from one table to another, then the entire tables were replaced. They played three or four 2 weeks in total."

We have the chance to do something extraordinary: break the bank in a casino"

One former croupier, who prefers 2 to remain anonymous, remembers that the Pelayos' winning streak happen to coincide with a labor dispute between management and staff 2 over an annual 2.6 billion pesetas in tips, complete with full and partial strikes throughout the year. "There was a 2 lot of confusion and some things went unnoticed. That probably was a factor. One of the tables, table 13 or 2 14, was in bad shape. The wheel hadn't been properly leveled, and they discovered this by watching and taking notes. 2 That is where they had their big wins, about 100 million pesetas. But their method never worked as well in 2 other casinos."

The book mentions other wins in Vienna (14 million pesetas in one night), Amsterdam (almost 13 million) and 40 2 million in Lloret de Mar, where the movie was filmed. But apart from one old Casio calculator, little physical evidence 2 of this past remains today in the penumbra of Gonzalo's bedroom. After being repeatedly thrown out of the Torrelodones casino, 2 he continued to visit the its roulette tables through his string of "underground" players, which included Luis Mazarrasa, a journalist 2 who later published his story in EL PAÍS. There is something about the Pelayo clan that causes one to suffer 2 a slight case of the Stockholm Syndrome. They welcome every visitor as if he or she may be the beginning 2 of something new; there is a half-carved ham leg in the kitchen, and something about the smell of the house 2 and the bookshelves full of movies and albums activates that part of your brain where memories of childhood are stored.

Beyond 2 this, there is the money. Mazarrasa recalls winning 1.8 million pesetas (just over 10,000 euros) in three days. García-Pelayo's team 2 broke up in 1995, when he set up an illegal poker establishment. That's another story - maybe another movie. At 2 the end of his roulette adventures, García-Pelayo had a stash of over 60 million pesetas. But money doesn't last long 2 in the hands of a gambler and travel lover. "For Easter holidays, I will only have whatever I get out 2 of these bets. I live day to day," he says. It is still Tuesday when his winning horse, Going

Wrong, 2 finishes ninth, Verdasco loses more than four games to Del Potro, and the cry of "Goal!" continues to be heard 2 from the other computers.

Pesquisadores levantaram esperanças de atrasar a demência depois que descobriram uma vacina recentemente aprovada contra herpes zoster foi ligada à redução substancial nos diagnósticos da condição paysafecard roulette seis anos após receber o tiro.
A descoberta, baseada paysafecard roulette registros médicos dos EUA sugere que além de benefícios para a saúde da prevenção das telhas uma condição dolorosa e às vezes grave nos idosos - o vírus também pode atrasar os sintomas do aparecimento dessa doença.
O Dr. Maxime Taquet, da Universidade de Oxford e o primeiro autor do estudo disse que os resultados apoiaram a ideia segundo as quais vacinar herpes pode prevenir demência: "Se validados paysafecard roulette ensaios clínicos estes achados podem ter implicações significativas para idosos ou serviços médicos".
Quando uma vacina contra herpes zoster, Zostavax foi lançada pela primeira vez paysafecard roulette 2006, vários estudos encontraram indícios de que o risco da demência parecia ser menor naquele.
O desenvolvimento de uma nova e mais eficaz vacina contra as telhas, a Shingrix levou à rápida mudança nos EUA paysafecard roulette outubro 2024, ou seja aqueles que foram imunizados antes dessa data receberam Zostavax.
A equipe de Oxford estudou os registros sanitários dos mais do que 200.000 cidadãos norte-americanos vacinados para telhas, cerca da metade das quais receberam a nova vacinação. Nos próximos seis anos o risco foi 17% menor naquele paysafecard roulette quem recebeu Shingrix comparado com ZostavaX
Para aqueles que passaram a desenvolver demência, isso equivale ao acréscimo de 164 dias ou quase seis meses vividos sem essa condição. O efeito foi mais forte nas mulheres paysafecard roulette 22% do homens com 13%
Os pesquisadores passaram a examinar as taxas de demência paysafecard roulette pessoas que receberam outras vacinas. Escrevendo na Nature Medicine, eles descrevem como aqueles dados ao Shingrix tinham um risco 23-27% menor para Demência doque aquelas vacinadas contra gripes tétano diftéria ou cotusse Um dos autores da pesquisa é consultora no GSK - fabricante e pesquisador responsável pela publicação farmacêutica – mas os investigadores disseram ter sido conduzido sem qualquer envolvimento com o estudo quando ele foi realizado por meio médico
No ano passado, o NHS disponibilizou a Shingrix para pessoas que completam 65 anos. "A expectativa é de se este for realmente um efeito causal então veríamos uma redução na demência no Reino Unido assim as pessoa começarem tomar-se da vacina Sincriz", disse Taquet

Existem mais de 55 milhões pessoas paysafecard roulette todo o mundo vivendo com demência e 900.000 apenas no Reino Unido, uma a cada três indivíduos desenvolverá essa condição durante paysafecard roulette vida inteira; enquanto medicamentos que parecem retardar esta doença foram recentemente aprovados não há cura para isso!

O último estudo não prova que Shingrix atrasa a demência, mas o Prof Paul Harrison sênior autor do artigo disse mais grupos estavam trabalhando na questão. Se as vacinas protegem contra demência é claro como isso acontece uma possibilidade seria um ressurgimento da doença nas telhas provoca alterações patológica e leva à Dementia outra coisa são os produtos químicos chamados adjuvantes paysafecard roulette vacina para tornar melhor paysafecard roulette resposta imune ao vírus pode ser usado no tratamento das doenças graves

Também não está claro se qualquer proteção contra a demência seria mais eficaz caso as vacinas fossem dadas aos jovens, como aqueles na faixa dos 50 anos ou que elas desapareceriam muito cedo.

"Será interessante ver se esses dados serão divulgados, que mais pessoas optam por tomar [Shingrix] quando lhes é oferecido", disse Harrison. "Eu certamente não recomendaria as Pessoas devem começar a exigir A vacina só porque eles acham isso vai reduzir o risco de demência."

Andrew Doig, professor de bioquímica da Universidade Manchester disse: "Este é um resultado significativo comparável paysafecard roulette eficácia aos recentes medicamentos anticorpo para a doença. Administrar o vacina telhas recombinantes poderia muito bem ser uma maneira simples e barata reduzir os riscos do Alzheimer s."

"Agora, precisamos executar um ensaio clínico da vacina [nova] comparando pacientes que recebem a vacinação com aqueles recebendo placebo. Esta é uma maneira mais confiável de descobrir o quão bem funciona essa droga e quantos anos esse efeito pode durar para os indivíduos paysafecard roulette idade jovem." Sabemos como se iniciam as décadas antes dos sintomas serem aparentes; portanto ela poderá ser ainda melhor quando administrada às pessoas".
